

Granular Products

Our bespoke granular products are a novel blend created using the residue from dried poultry litter and struvite to create a range of sustainable fertilisers

**Sustainably sourced and
low carbon footprint**

**Suited for a wide
range of crops**

**Meticulously
granulated to 2-5 mm**

**Guaranteed to Spread
up to 36 m**

Trace Elements

Along with essential nutrients which are phosphorus, potassium, sulphur and calcium, our products contain beneficial trace elements including magnesium, manganese, copper, and zinc, selenium and boron.
