

CDD Vault is a comprehensive informatics platform tailored to meet the diverse needs of scientific research teams across the pharmaceutical, biotechnology, and academic sectors.

Registration

Researchers can easily register, search, and organize their data, ensuring data integrity and accelerating decision-making processes.

<u>Activity</u>

Enables researchers to organize, analyze, and visualize experimental results, facilitating datadriven insights and informed decision-making.

Inventory

Manages laboratory inventory efficiently with tools for tracking stock levels, ordering supplies and maintaining inventory records.

Electronic Lab Notebook

Document experimental procedures, observations, and results in a structured format with easy searchability for easy reference and review.

Visualization

Visualize complex scientific data with interactive charts, graphs and plots to identify patterns, trends and relationships.

Deep Learning

CDD Vault's similarity search enhances the efficiency of compound screening and accelerates the identification of promising leads in drug discovery efforts.
