

IBC2024

Foundation for XR and AI-Powered Galleries  
2023 IBC Accelerator

#ACCELERATORS2024

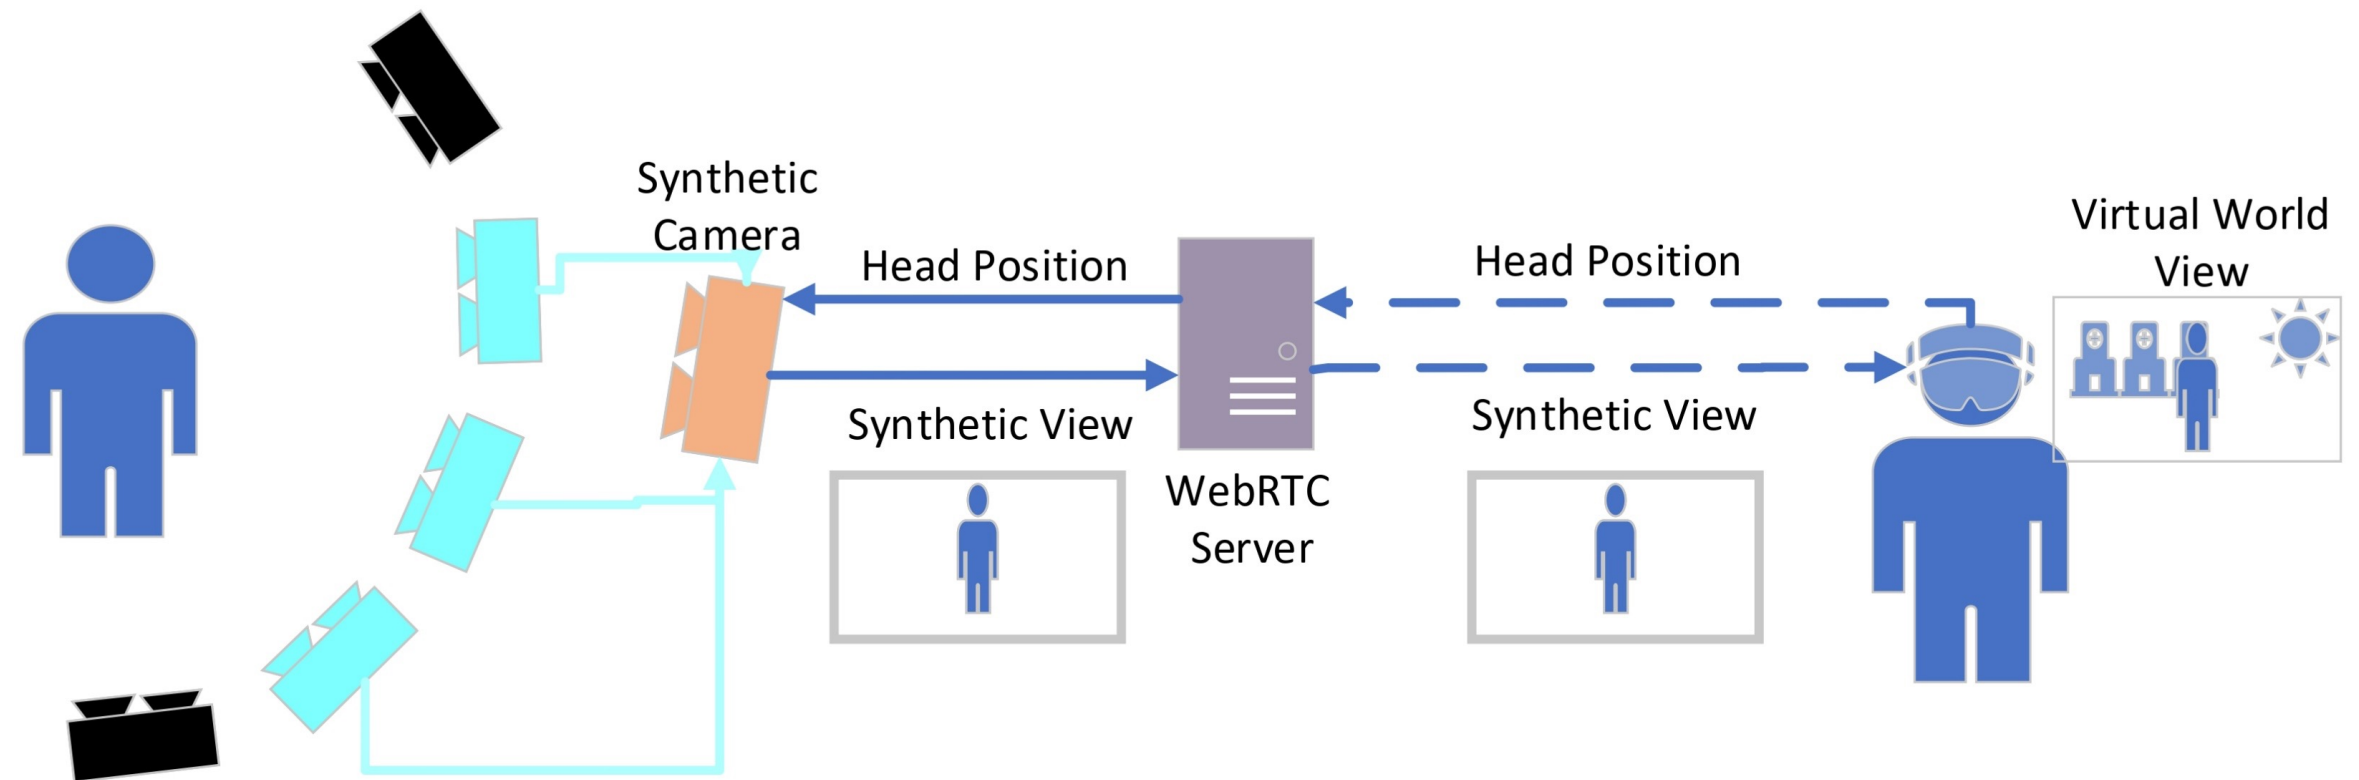

# GALLERY AGNOSTIC MEDIA PRODUCTION

# 3D Human integration in Unity

- **FVV Live:** 9 Stereo cameras capture the scene (RGB+D)
- Green Screen setup to segment people
- Remote rendering approach

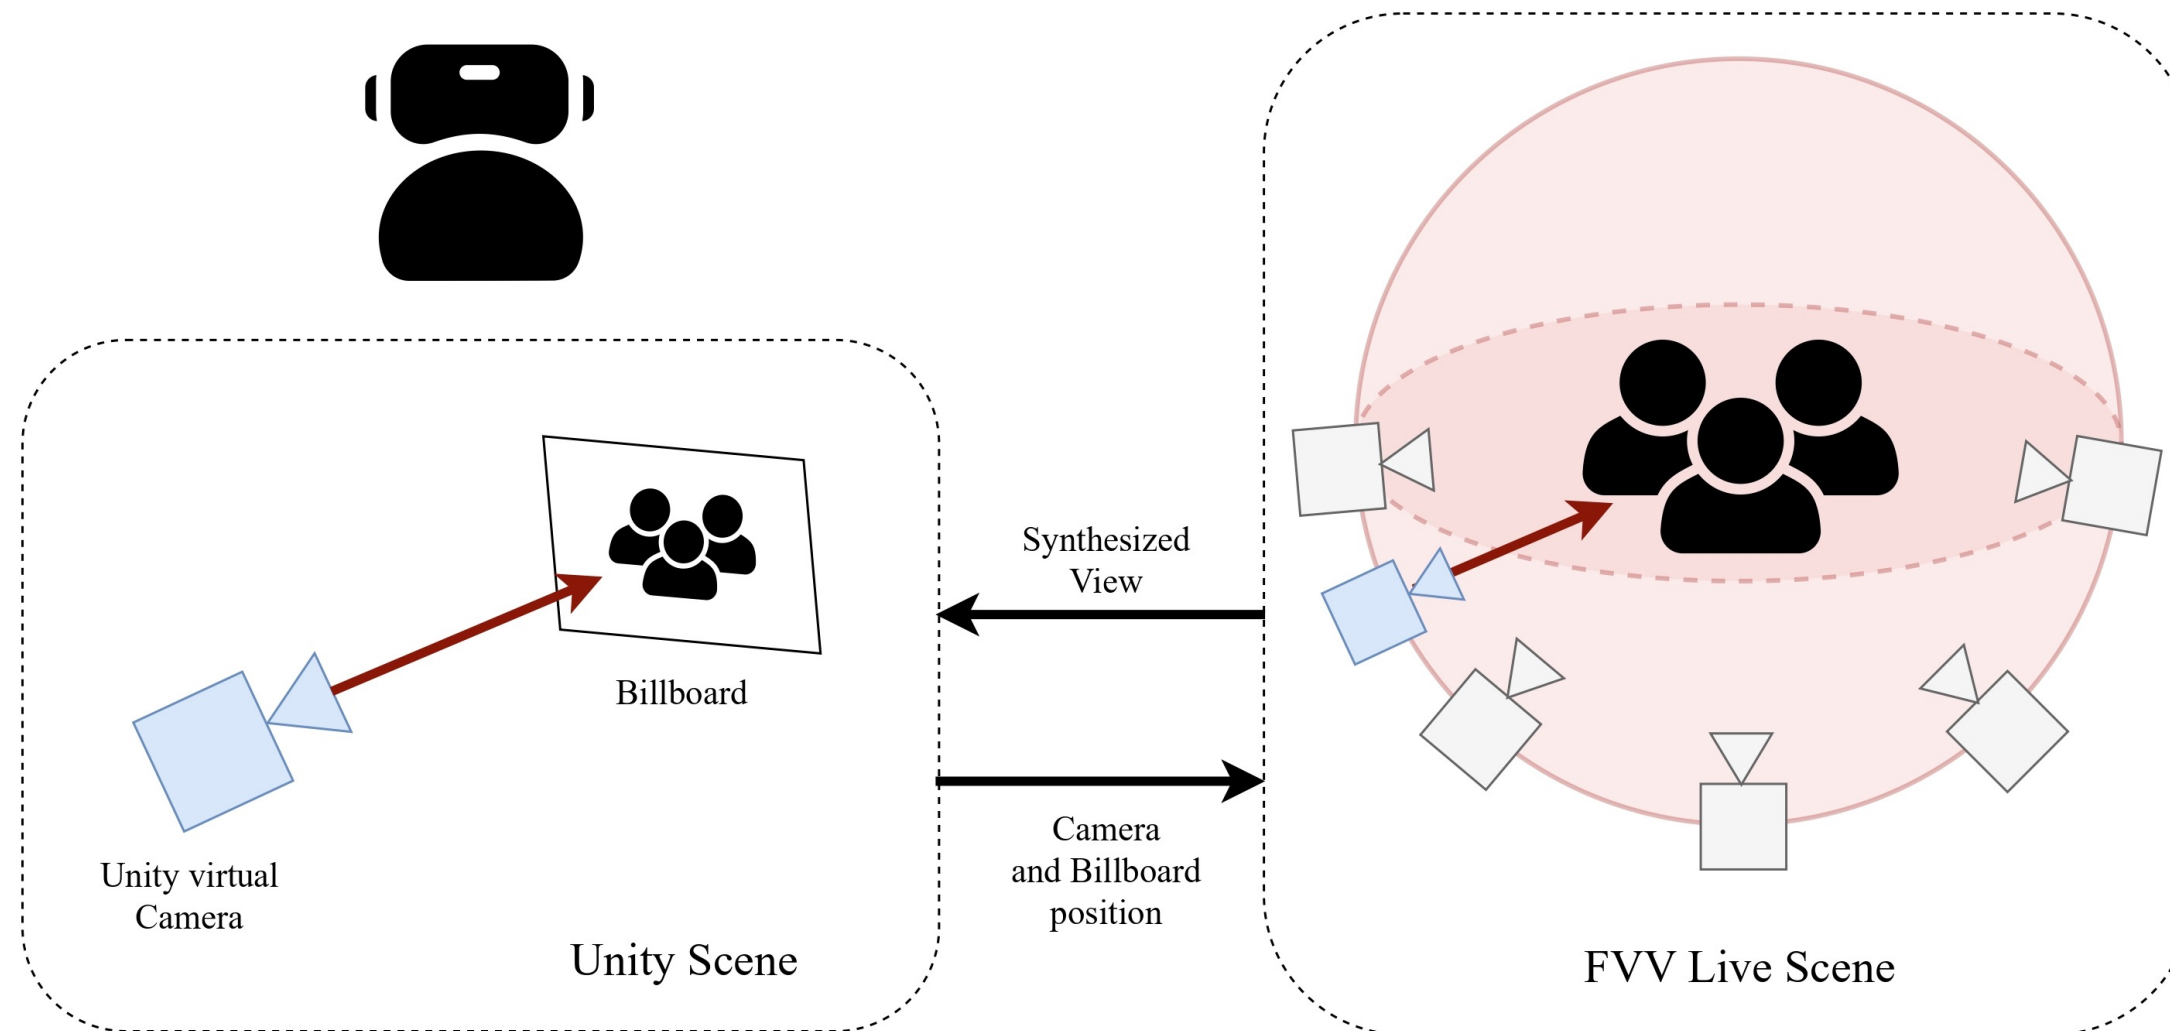

IBC2024

#ACCELERATORS2024

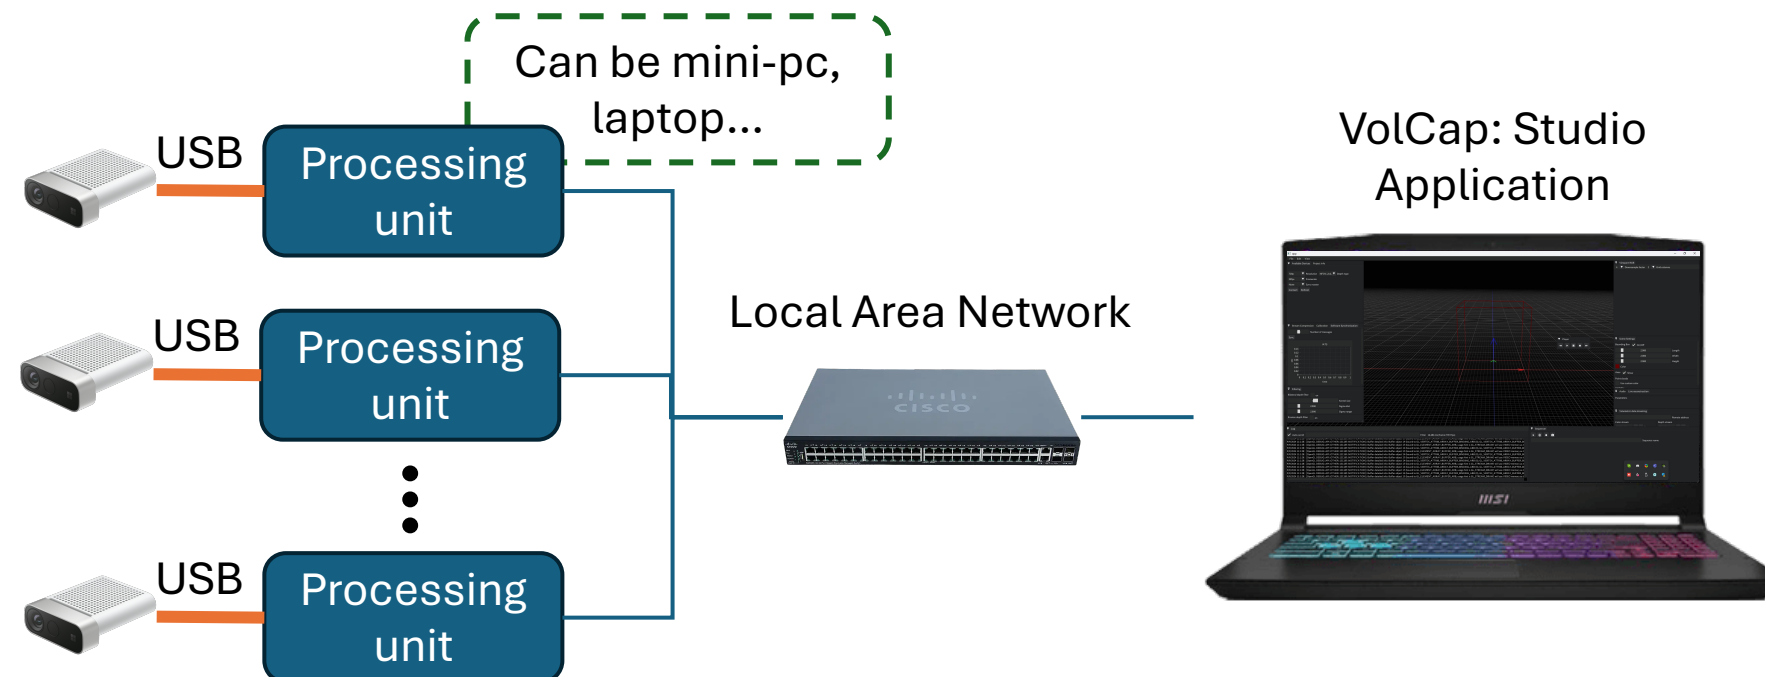

## Rendering a coherent view yields volumetric sensation

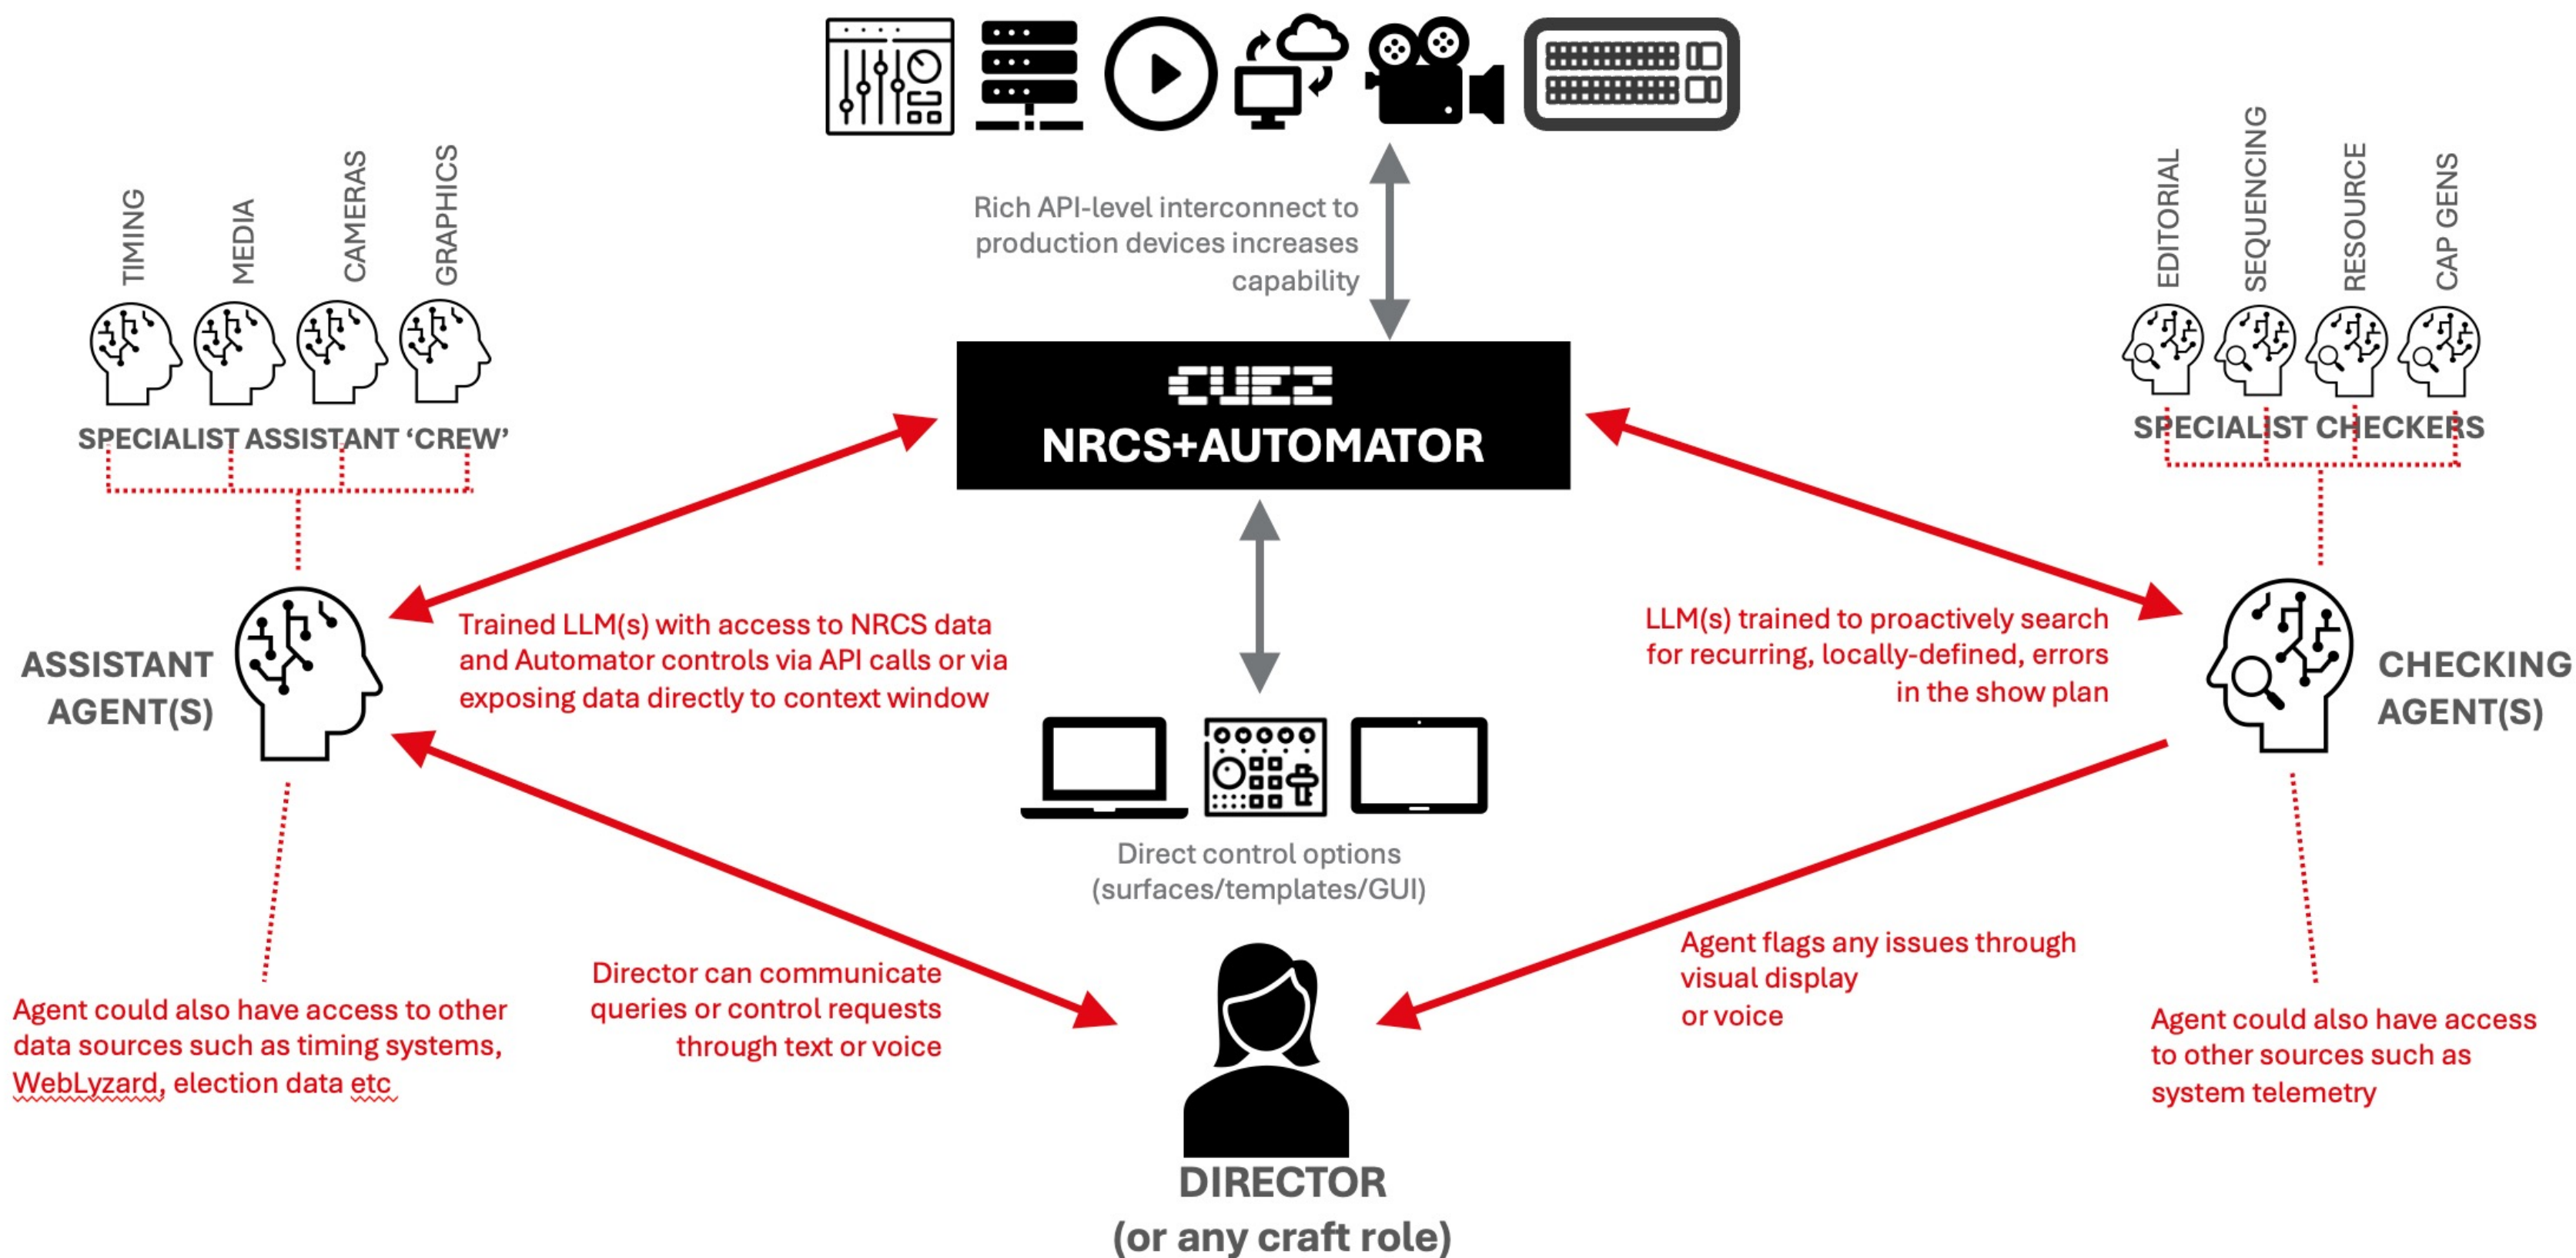

- The video received is played on a billboard inside of a Unity scene
- The server takes the direction from the user to the billboard to render the virtual view

# TRANSMIXR Volumetric Video XR Studio

- Distributed solution
- Provides scalability
- Easy to assemble with commodity-based hardware
- Easy to use
- AI-based spatial camera calibration solution

IBC2024
