GovWare Focus Series

Dear GovWare Community,
Greetings once again!

Our businesses, our lives and our world as we know it has changed and on such an unprecedented scale and speed in the past months. But together as a community, we take heart in knowing that we will overcome and recover from a crisis as such, and we will also emerge stronger. We have in the past and will continue to achieve this with resilience, grit and the innate drive to advance.

And it is in this spirit that the GovWare team is approaching the changing landscape of conferences, trade events and the industry's needs in growing businesses, training, information sharing and governance, and so forth.

Over the last few months, our team has been in on-going dialogues with the relevant authorities, our enterprise and government partners, as well as our end-user community, to assess the feasibility of our plans for GovWare this year and next. We are truly grateful for all the guidance, support and open feedback that we have received, which has helped us shape these plans forward.

With the potential health risks associated with COVID-19, and the strict government regulations imposing travel bans and prohibiting large gatherings. We will keep you updated on the new dates.

As we navigate through these new challenges, we at Image Engine as the organiser of GovWare, remain committed to supporting you and keeping you informed and connected through a series of new programmes.

As a direct response to the continued need for information and engagement during the second half of 2020, we are launching the GovWare Focus Series during the original dates for GovWare 2020. We are also pleased to work with other cyber community stakeholders for complementary platforms that serve the needs within sector-specific areas of the ecosystem. Details of these are below, and we are planning these as on-going efforts to better serve and connect you beyond the COVID-19 situation as durable additions to the GovWare stable of offerings.

ALL NEW GovWare Focus Series

As the global community strives to emerge from the COVID-19 pandemic, new and salient challenges add to the existing demands of cybersecurity and the programmes it powers. These will also form a focus area for the community to examine.

The all-new **GovWare Focus Series** is conceived to serve as the information resource for critical industry insights and trends, as well as the connectivity platform for the community during this period.

The first GovWare Focus will be a free-to-attend virtual conference and showcase.

It will focus on the professional and industry development aspects. The quality and standards on commercially neutral content will remain a hallmark, and safeguarded by a Programme Committee composed of acknowledged experts from the user and industry practitioner domains.

GovWare Focus 2020

Virtual Conference and Exhibition

7 – 8 OCTOBER

OT-ISAC VIRTUAL SUMMIT 10 SEPT 2020

OT-ISAC Virtual Summit 2020 brings together CISOs and practitioners from Asia to collectively shape security best practices and strategies in ICS/OT.

The Operational Technology Information Sharing and Analysis Centre (OT-ISAC) was jointly launched by Cyber Security Agency of Singapore (CSA) and Global Resilience Federation (GRF) in 2019. The OT-ISAC is the first of its kind in Singapore, and was created to protect OT Critical Information Infrastructure through security information exchange among OT-ISAC members, vendor partners and government. Image Engine is proud to be the co-organiser of the first OT-ISAC virtual summit.

THE CYBERSECURITY AWARDS 2020 6 NOV 2020

Image Engine is supporting The Cybersecurity Awards as a Community Partner.

Organised by The Association of Information Security Professionals (AiSP), the Award seeks to honour outstanding contributions by individuals and organisations, to local and regional cybersecurity ecosystems. Visit theycybersecurityawards.com for more info.

Thank you for your on-going support and understanding.
