

MICRO HARVEST

Bridge2Food Europe
Luísa Cruz - Co-Founder & CTO

The protein gap cannot be solved with soy and insects alone

Plant-based protein has limitations in nutritional value and taste.

Challenges for insect protein remain to come scale, consistent quality and competitiveness.

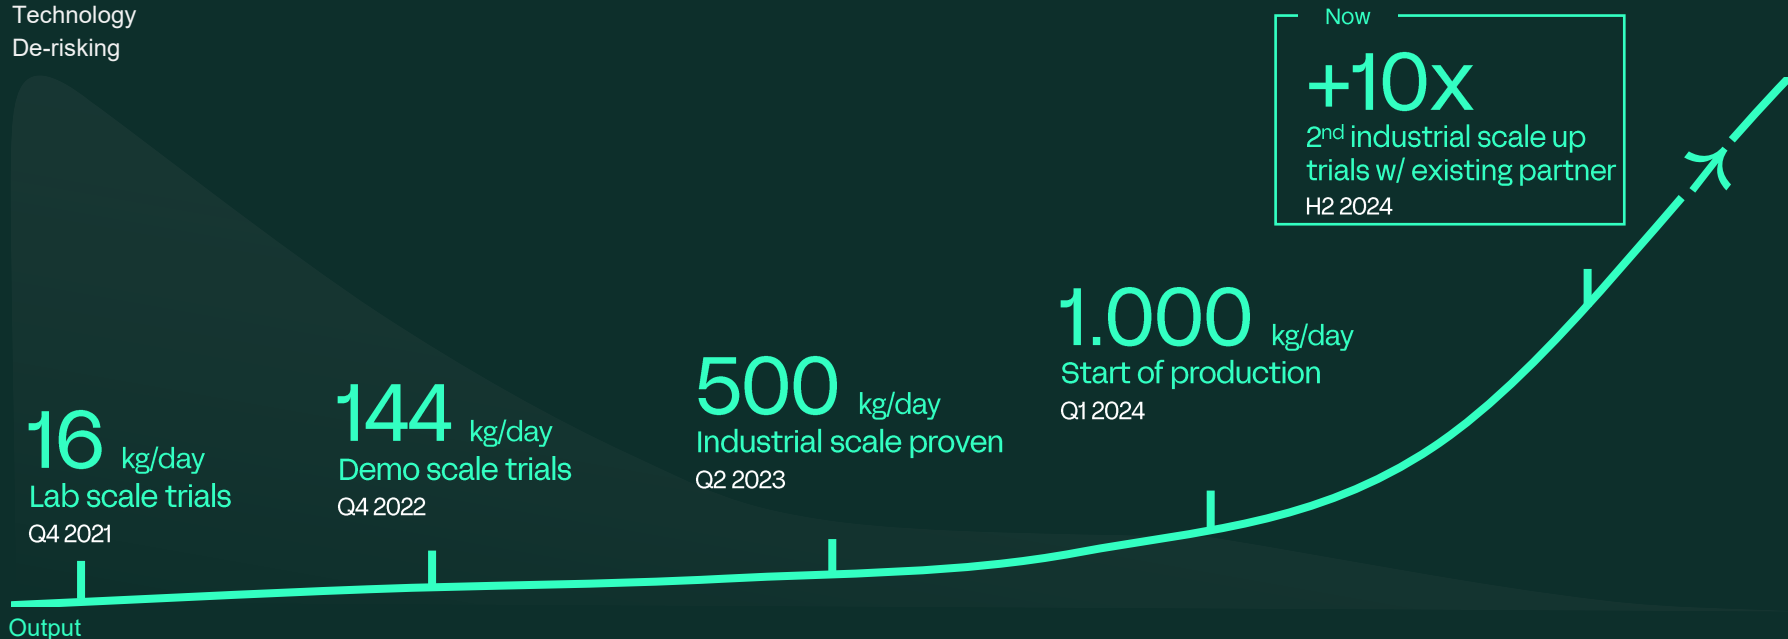

MicroHarvest protein is the solution

- ✓ High protein content
- ✓ High palatability
- ✓ Price competitive
- ✓ Flexibility on input & output
- ✓ Unseen productivity ←
- ✓ Proven scalability ←
- ✓ Superior robustness ←

Ready for large-scale commercial production at record speed

Technology
De-risking

➔ Full commercial application – TRL 9 – reached by end of the year 2024

Perfect fit for application in Food

Nutritious protein base for dairy or meat alternatives.

Perfect protein base for sweet & savoury snacks

Allows to increase protein content and additional functionality

Together, we are HUNGRY FOR THE BETTER

JOIN US in transforming our food system and
building a global champion in protein
