flexible solutions for your business needs

WHAT OUR PARTNERS SAY

"GreenEnco's approach and expertise helped us pinpoint technical issues on a plant that were eluding us. The report they provided made the decision making and the implementation of required measures simple and efficient."

JULIEN WAEHLTI
ASSET MANAGER - SMART CITY
ROMANDE ENERGIE, SWITZERLAND

"We have been working with GreenEnco since 2019 and they are a trusted partner for quality solar engineering work."

- Their team has helped us plan and optimise our PV projects.
- They have also supported us throughout the planning processes and have efficiently accommodated design changes as required.
- They have the expertise to support the development process from end to end including design, civil/electrical configurations, plant selection and optimisation."

PETE GROGAN
COMMERCIAL DIRECTOR,
HARMONY ENERGY, UK & NEW
ZEALAND

TECHNICAL ADVISOR & DESIGN OPTIMISATION

Owners/Lenders engineering.
Construction monitoring.
Irradiance assessment.
Energy yield assessment.
Design optimisation.

SOLAR ASSET OPTIMISATION

PV Asset performance
management (PVAPM)
using AI and ML
algorithms to optimise
solar generation.

FLOATING SOLAR DUE DILIGENCE

Design optimisation. Due
diligence on floater body
and anchoring & mooring
system. Additional
generation gain study.

ZERO-EMISSION EV CHARGING STATION

Decarbonize transport sector.
Solar carport / rooftop solar.
EV charging.
Energy storage.
