

Uniting UK space-enabled climate expertise & services

Who we are

Space4Climate is a non-commercial membership organisation for the UK's thriving Earth Observation (EO) climate community.

We convene expertise in the development of satellites, the analysis of data they gather and the production of quality assured global data and climate services and products.

Led and funded by our stakeholders, we are chaired by the UK Space Agency, hosted by the National Centre for Earth Observation and based at the University of Reading.

Who are our members?

Our members span government, industry, academia and the Third Sector. UK-based multinational corporations sit side-by-side with SMEs, start-ups, world-leading academics, funders and government officers, all with an equal voice.

What we do

Space4Climate promotes the role of space in underpinning climate policy, action and services, enabling and encouraging the use of trusted climate data and development and take-up of climate services and products.

We represent the UK EO community on the national and international climate stage where we create speaking opportunities for members.

Among our events for members are:

- Innovation workshops
- Forums introducing new sectors to EO
- Group meetings and conference
- Stands at external events and exhibitions

Our services include:

- Funding opportunities
- Knowledge sharing and exchange events
- Members' newsletters
- Sourcing and collating industry-wide information
- Access to cutting-edge research
- Briefings
- Convening UK expertise to respond to emerging and urgent climate challenges

Speak to us today to find out Space4Climate can help you.

SPOTLIGHTING YOUR WORK

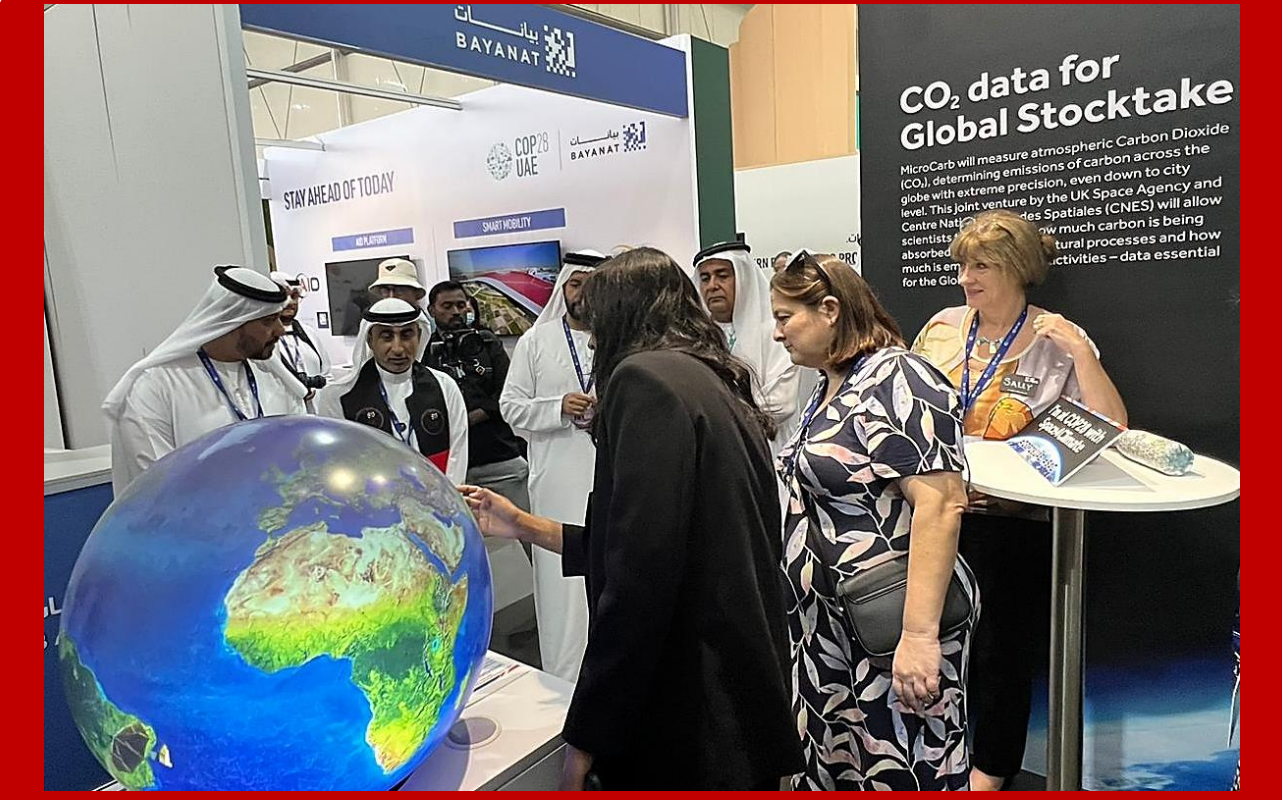

We produce professional content that showcases the impact our members are making through climate research, products and tools. Using layperson's language, we work with you to emphasise the difference your capabilities make in the UK and globally. Watch some of our case studies here:

REACHING NEW AUDIENCES

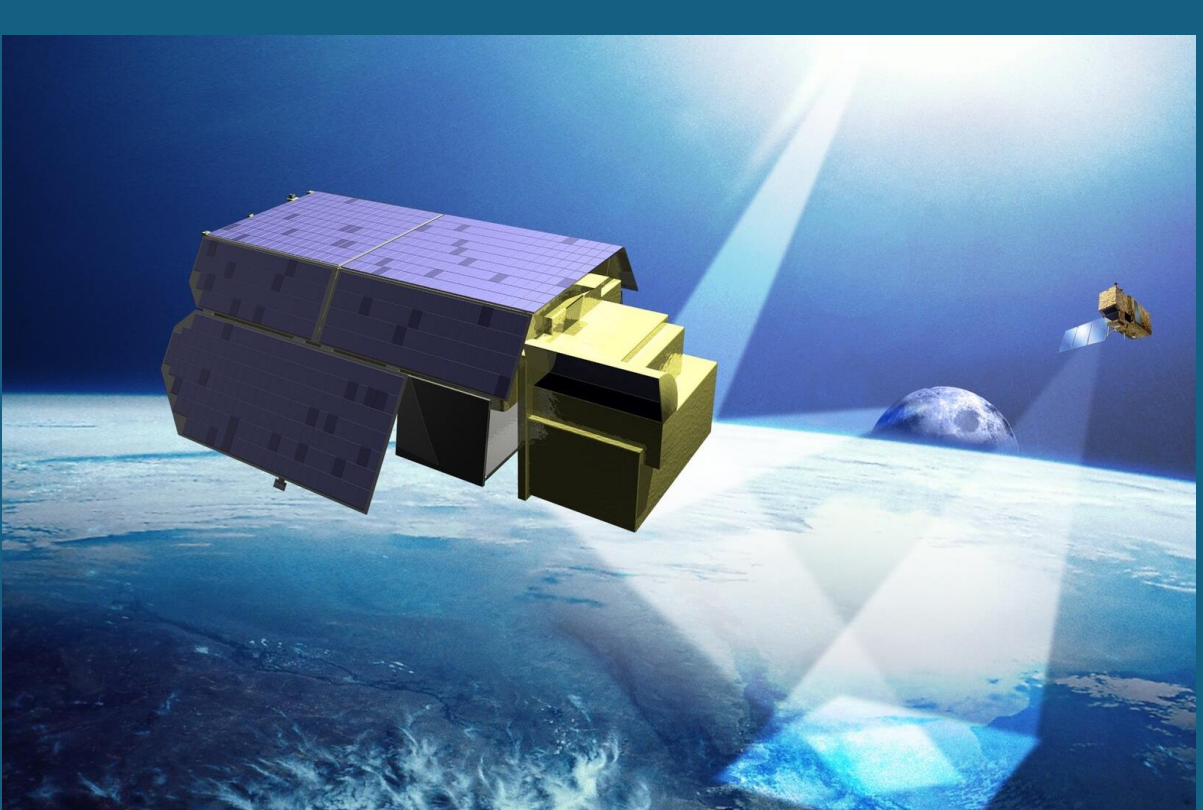

Membership of Space4Climate puts you in front of funders, stakeholders, collaborators and potential clients through:

- Speaking opportunities
- Earth Observation 101s
- National & international policy events
- Stands at trade & industry shows
- Policy Briefings
- The S4C App
- Events for sectors new to EO
- Communications campaigns

SPACE4CLIMATE @ COP

Space4Climate puts the UK on the global climate map at the UNFCCC COP world summits. With a strong record of successful events, and busy stands we represent the UK's expertise in climate science and climate services to senior figures in policy and industry from around the world.

SATELLITE CLIMATE MISSIONS

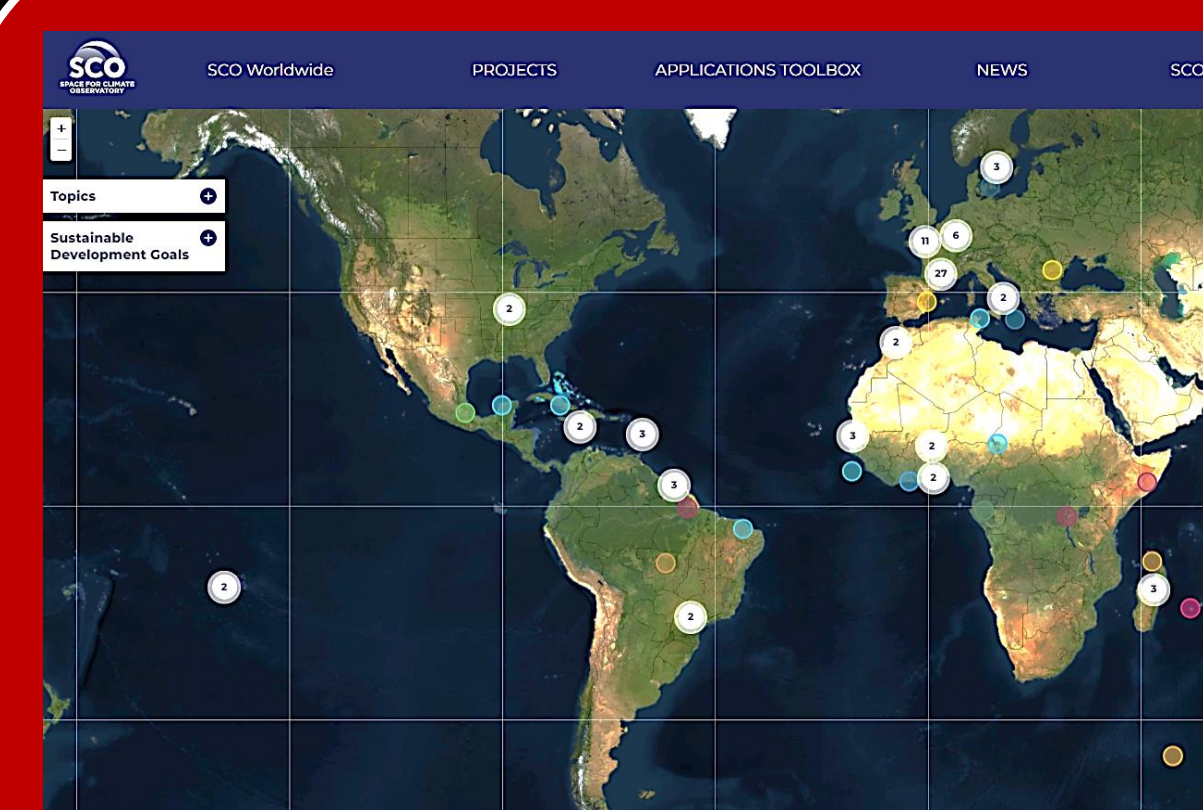

Our popular Mission Explainers promote the UK's involvement in future and current climate satellite missions. From scientists to industry the UK plays a key role in every stage of designing and building satellites and in gathering data from space to address and monitor climate change effectively.

RESOURCES FOR GROWTH

We are developing a new Climate Services Hub. Members and non-members can list services and tools free of charge. We are also the UK focal point for the Space Climate Observatory platform.
