

About

A significant portion of household energy is wasted due to inefficient heating and cooling. At Resolia, we offer innovative solutions to turn this challenge into an opportunity. As decarbonization experts, we support projects in Belgium, Luxembourg, and France to develop sustainable and efficient energy systems.

RESOLIA

RESOLIA

Sustainable solutions for a responsible future.

DECARBONATION CONSULTING

We develop decarbonization strategies tailored to your requirements, thanks to:

- ✓ Energy potential studies
- ✓ Geographic energy audits
- ✓ Territorial planning and energy masterplans
- ✓ Legal, economic, and regulatory expertise

GEOHERMAL ENERGY

As specialists in geothermal energy, we develop customized systems to harness this renewable energy source.

- ✓ **Closed geothermal system**
We determine the dimensions of geothermal probe fields.
- ✓ **Open geothermal system**
We study and implement your groundwater geothermal project.
- ✓ **Drilling and testing**
We prescribe and supervise all your geothermal projects.
- ✓ **Financial support**
We provide support in financing your projects

THERMAL NETWORKS

We design sustainable heating and cooling networks, integrating the latest technologies.

- ✓ **Sourcing study**
We evaluate diverse renewable energy sources, including waste heat, geothermal energy, aquathermal energy, biomass, biogas, and more
- ✓ **Smart audit**
We analyze energy needs to optimize local resource use.
- ✓ **Design**
We design internal and external heating networks for industrial, residential, and tertiary buildings.
- ✓ **Construction management assistance**
We support your project throughout the construction stage.
