Structural Insulated Panels

Redefining structural insulated panel (SIP) technology with patented, next generation designs. Built for speed, precision, performance and versatility – our future-ready solutions empower developers to deliver high-quality homes faster, more efficiently and at scale.

The Ultrapanel Advantage: Ultra-Fast

Through our scalable manufacturing process, **Ultrapanel accelerates construction timelines**, arriving onsite pre-fabricated ready for rapid assembly by our trained installers.

Accelerates Building Programmes

Reduces Schedules by up to 40%

Weather-Tight Structures in Days – not weeks

Enhances Cash Flow

Shortens Construction Finance

Reduces Dependency on Skilled Trades

External, Internal, Party Walls, Warm Roofs, Retrofit External Wall Insulation

Complete Superstructure for an Ultrapanel home

Speed, Sustainability and Structural Integrity in a Unitised Solution

The Ultrapanel Advantage: Ultra-Value

Developed with a strong focus on economic performance – **Ultrapanel can deliver up to 8% cost savings** when compared with a conventional open-panel timber frame. Shorter construction timelines mean earlier completions – bringing forward occupancy or sales.

The Ultrapanel Advantage: Ultra-Versatile

Insulation depths and types can be varied to meet project demands. **Streamlining the process from manufacture to assembly**, by combining structural support and insulation in an integrated panel – eliminates the need for separate framing or insulation.
