2G Chemical Plastic Recycling

José Daniel Vega
General Manager
jdvega@2gcpr.com
(+34) 670 281 672

2G CPR – Advancing Circular Solutions for Plastic Waste , 2G CPR is an innovative technology company transforming plastic waste into circular resources through advanced chemical recycling. Its industrial pyrolysis technology converts complex, difficult plastics into high-value pyrolysis oil used to produce new plastics and chemicals, helping close the loop in the plastics value chain while reducing waste.

EarthPulse

Judit Hernandez i Ribé
BD Manager
judith@earthpulse.ai
(+34) 696 033 997

EarthPulse transforms satellite data and AI into practical tools for planning, monitoring, managing and responding to environmental challenges. We apply this technology to deforestation, carbon credits, water leaks, vegetation around power lines and climate risks, helping businesses and public authorities anticipate impacts and prioritize action.

Energy in the Cloud

Ramon Gallart Fernández
CEO
ramon.gallart@energyinthecloud.com
(+34) 633 032 639

Energy in the Cloud transforms the electrical grid, both front and behind the meter, with IDPR-based technologies thanks an intelligent device that stabilizes voltage, optimizes renewable energy use, and enables demand electrification without major investments, driving stability, efficiency, and new revenue streams.

www.hy5.energy

Hy Five

Vincent Darcos
Business Development Director
vda@hy5.energy
(+34) 672 774 684

HyFive is a developer, owner, and operator of green derivatives production assets in Spain, focusing on e-methanol and e-SAF to help decarbonize the maritime and aviation sectors. The company is fully owned by White Summit Capital AG, an energy-transition infrastructure investment manager founded with over €2 billion invested since 2011.

www.jolt.tech/

Jolt

Leon Rizzi
CEO
lrizzi@jolt-solutions.com
(+34) 690 876 611

Jolt is an industrial company that manufactures electrodes using proprietary technology that enables mass production, simple and cost-effective scaling, and very low environmental impact. Our main focus is water electrolysis for green hydrogen, while we also serve chlor-alkali processes, pool chlorination, and wastewater treatment.

www.lobelia.earth

Lobelia

Jorge Calvin
Commercial Director
jorge.calvin@lobelia.earth
(+ 34) 621 037 742

Lobelia Earth delivers blended satellite and climate data services to quantify physical climate and nature-related risks. Our SaaS and DaaS platforms provide global financial impact metrics and sectoral and asset-level assessments to support adaptation, risk pricing, and resilient investment decisions at portfolio and asset level.
