

Verifiable proof. Audit confidence.

# Competency Management

We know completing a training course is just the beginning. In high-hazard working environments, you need to be able to prove every person on site has the skills and knowledge they need to do their job safely.

## Platform benefits

### Quick deployment

Set up and launch quickly with intuitive configuration and automated workflows. Define roles, assign competencies and start tracking performance without complex setup.

### Pre-built content

Access ready-to-use, sector-specific e-learning mapped to your competency frameworks. Standardise training, accelerate development and link learning directly to capability.

### Mobile accessibility

Empower teams to evidence and manage competence anytime, anywhere. Capture proof of skills, complete assessments and access dashboards on any device.

## Platform features

- ✔ **Job role setup** – Define clear skill levels for each role
- ✔ **Smart competency requirements** – Map learning to frameworks for consistency
- ✔ **Workflow assessments** – Streamline assessments and sign-offs online
- ✔ **AI-powered processing** – Analyse evidence and flag renewals instantly
- ✔ **Secure evidence management** – Capture and store verified proof securely
- ✔ **Live competency matrix** – View live capability status across teams and sites
- ✔ **Compliance dashboards** – Centralise learning and compliance insights

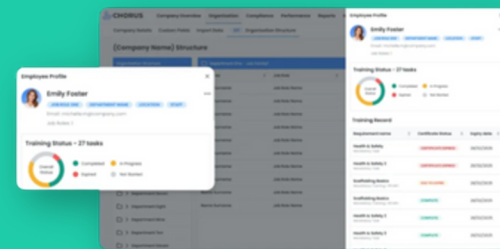

## Prove competence in high-hazard industries

You can verify evidence, run assessments and track renewals.

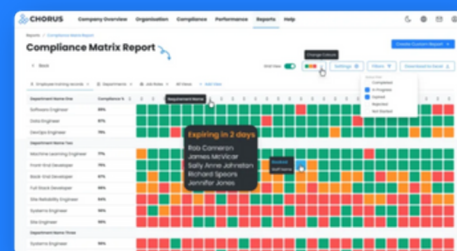

## Support career progression

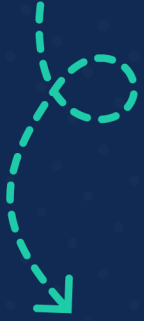

You can pinpoint the employees with the right skills who are ready to move up.

## Reduce risk

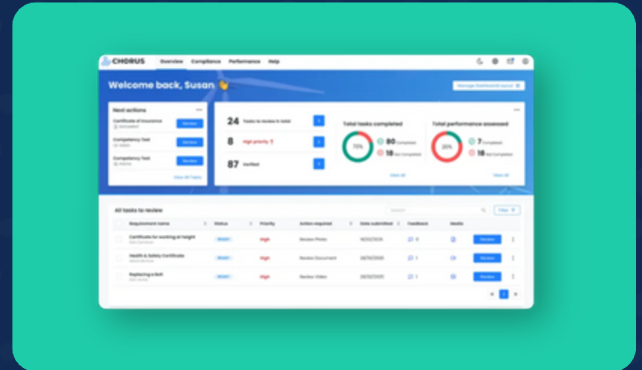

Protect your people and operations. Only those who are fully assessed and verified are marked as competent.

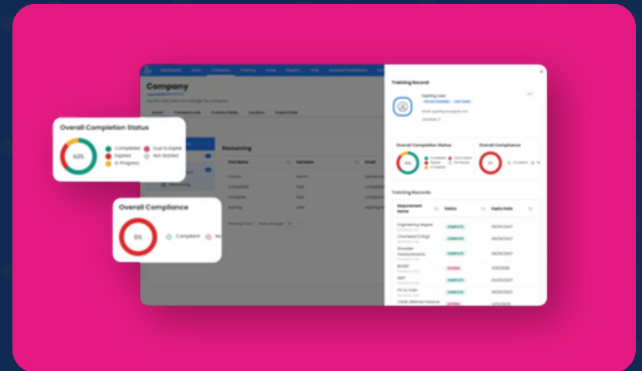

## Stay on top of fast-moving teams

Chorus automatically reassigns training and competency requirements when people change jobs or move elsewhere.

## Competence beyond training completion

Upload evidence and assessments to the Chorus system, showing who's really ready to do their role safely.

## Mitigating risks

With early warnings and a colour-coded training matrix, you'll be able to spot gaps early and be able to take action sooner.
