

CONTRIBUTION

7

Sustainable Network is an ecosystem which supports the development of impact focused, conscious, businesses and leaders.

COLLABORATION

6

As founders and investors ourselves we understand first hand, the difficulties faced by entrepreneurs in running and scaling a purpose and values driven business. Our experience has allowed us to create a bespoke ecosystem which provides a full spectrum assessment of the current position of both the founder and the start-up, then provide them with the resources they need to manifest their world changing ideas and visions into reality.

ALIGNMENT

5

The fate of our planet and society depends on each and every idea having a chance of success, yet behind every world changing idea is a person. This is why we believe in patient value creation and nurturing our founders, with a focus on wellbeing, personal development, conscious leadership and inner transformational work. This is delivered through our New Earth Academy Programme.

VIABILITY

1

The blend of our holistic approach to the nurturing of founders and start-ups, alongside proven commercial strategic support, enables the creation of a new wave of **"full spectrum"** conscious businesses and leaders, delivering both profitability and impact. To find out how to invest into the development and growth of this new standard of business, please read on....

© Barrett Values Centre

Our Mission

To harness the power of community and innovation to support the empowerment of a new wave of conscious, sustainable businesses and leaders that will enable our transition to a new sustainable earth.

Outer Vision

A world where we live in harmony with each other and our planet. Understanding and embracing the interconnectivity of all things, giving rise to a shift in global consciousness, that empowers humanity to thrive and co-create from a place of love.

The New Earth Academy

"A journey to full spectrum sustainability"

For business to transform, people must transform. Our academy programme provides our founders with everything they need to build a truly sustainable and impactful business.

The combination of our inner and outer curricula enables the development of purpose and values driven organisations.

Businesses following the New Earth Academy complete the course over a twelve-eighteen month period, ensuring a balanced approach to both the commercial & cultural growth within the company.

View our academy video here:
<https://www.youtube.com/watch?v=JmdlESBG-to>

The Inner

Developing conscious leaders and teams

The Outer

Creating certified sustainable businesses

Inner Curriculum

A focus on values and cultural evolution, alongside personal inner development, is the key to unlocking a sustainable future. Our inner curriculum delivers the inner work of our leaders and organisations, supporting the creation of a thriving company culture and prioritising the wellbeing of both individuals and businesses.

Outer Curriculum

We help organisations work towards recognised sustainability reporting standards and achieve a wide number of third-party Sustainability accreditations, such as B Corp, Future Fit and Net Zero certification. Our unique combination of proprietary technology and team of expert consultants help make such a process as rewarding and efficient as possible.

Why invest with us?

- All businesses we raise capital for have passed our investment readiness checks, which include review of investment materials, data rooms, business models and founder competence.
- Our extended "full spectrum" diligence processes extended beyond traditional metrics to include company values, purpose, culture, and sustainability strategy
- We provide investors with access to investments in businesses at the intersect of impact, innovation and profitability.
- We support our businesses throughout their entire commercial journey and take an ongoing investor governance role with our portfolio companies
- Our ecosystem has also been designed to mitigate investment risk, reduce failure rates, enhance ROI, accelerate impact and eliminate green washing from investment portfolios.

We are currently raising capital for our first fund. The fund will be supported by the "full spectrum" Innorbis measurement tool allowing investors to measure their impact across a wide range of metrics incorporating both inner and outer development.

Sustainable Network continues to nurture and develop our investor partnerships across each of the following sectors, enabling us to be at the intersect of sustainable investing, with:

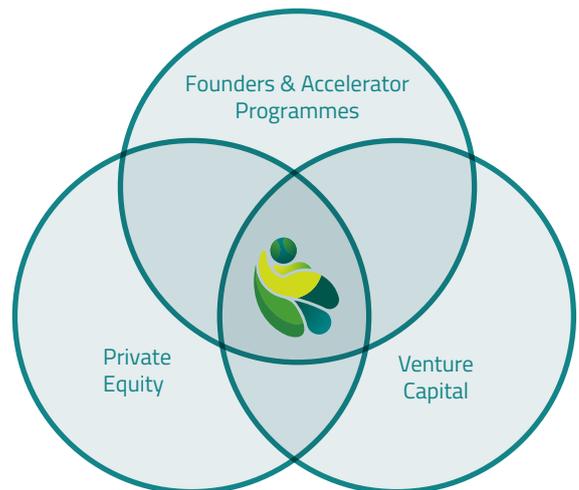

- Individual Investors (Angel/HNW/Sophisticated/ Professional)
- Investment Advisors
- Institutional Investors
- Corporate Investors
- Accelerator Programmes
- Family Offices
- Municipal Governments

We provide access to deals that match your funding and impact investment requirements:

- Private Equity (Pre-Seed, Seed, Series A, B, C)
- EIS and Venture Funds
- Direct Investments

We are currently focused on investment into the following sectors:

- Clean Energy / ClimateTech
- MedTech and Healthcare
- PropTech / Sustainable Housing and Infrastructure
- AgTech / Regenerative Agriculture
- FoodTech / Responsible Production and Consumption
- Smart / Clean Transportation

Sign up to our conscious investor community where you will be able to

- Customise & select opportunities that meet your investment criteria
- Access deal information, data rooms & feasibility reports
- Digitise your investment transactions, manage your pipeline, sign documents and track compliance; and,
- Communicate directly with our Investor Relations department

Our investment platform is hosted and regulated by Delio Ltd. Delio Ltd is a company registered in England and Wales under company number 09092423 and whose registered office is at 29 Windsor Place Cardiff, CF10 3BZ. Delio Ltd are authorised and regulated by the Financial Conduct Authority (FRN:773662). Neither Sustainable Network Ltd nor Delio Ltd provide any form of recommendation or advice. Most of the investments listed on the platform are not covered by the FSCS nor would investors have access to the FOS.
