

SHIP SMARTER WITH THE

NEW SERIES 1 FREIGHT CONTAINER¹

www.bidbird.co

Save 5.2% fuel and reduce your carbon footprint with BidBird's aerodynamic, skinned containers.

From production to shipping, the current carbon-cutting efforts simply aren't enough. I started BidBird to propel these actions forward—and seal the cracks in our supply chain.

Through my work as an architect, I examined the aerodynamic drag caused by the ridges (or flutes) on the sides of the old series 1 freight container. My new invention will not only bring fuel- and cost-saving solutions to logistics companies, but to the economy as a whole. Meet the new, sustainable way for fleets to carry goods across the globe...

Skin smooths out flutes for aerodynamic performance

Choose your paint & logo decals for a sleek new look

✓ Reduce CO2 emissions by **26.3 tons** per tractor trailer, per year²

✓ Save up to **\$9,369** on diesel costs each year³

LEARN MORE AT **BIDBIRD.CO**

¹ patent pending

² based on EPA's Greenhouse Gas Equivalencies Calculator

³ based on 300 driving days per year, 150 gallon tank, 5.2% fuel savings (AAA.com, May 15, 2023)

Original series 1 freight container

AT A GLANCE

BOOST YOUR ESG RATING

Lower emissions with a climate-conscious shipping solution.

SPEND LESS ON FUEL

Skinned design improves mileage by 5.2%

EASY ASSEMBLY

Magnetic panels snap on in minutes not days
