Treeconomy

Unlocking nature's value

Treeconomy is a carbon removal & nature restoration company. We use remote sensing & machine learning technology to quantify, track & deliver value for nature. We provide all the necessary information for companies to confidently fund & develop nature-based carbon removal projects.

WHY DELIVER NATURE'S VALUE?

To achieve all the Sustainable Development Goals (SDGs), we need a stable climate and a healthy environment - both depend on natural resources or "natural capital".

$44 trillion of economic value generation, **is moderately or highly dependent on nature and its services (WEF)**

nature-based solutions can provide **1/3** of the mitigation required up to 2030 to help meet the Paris agreement targets

Nature restoration projects are our **lowest-cost technology** for removing CO2 from the atmosphere in the **short & medium term**

HOW CAN WE HELP YOU?

We are developing an accounting system for nature, quantifying impact in terms that speak to carbon removal buyers, investors, and project developers alike.

| **Landowners**	**Carbon Buyers**	**Natural Capital Investors**	**Project Developers**
We support you with your nature restoration projects throughout their development and monetisation stages.	We supply you with technology-verified carbon credits from high-quality nature-based projects you can trust.	We help you enhance the value of your natural capital supporting real asset investments.	We provide you with AI driven remote monitoring for natural capital baselining and ongoing project oversight.

WHY SHOULD YOU WORK WITH US

Fund quality you can trust

Boost your investment confidence with our technology-verified nature restoration projects. Developed in collaboration with landowners, each project reduces carbon emissions while prioritising the environment, biodiversity, and local communities.

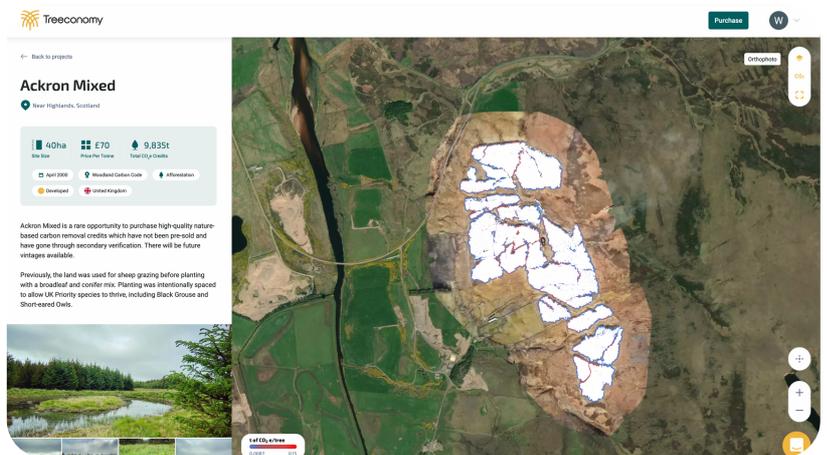

Project monitoring that is easy but rich

Easily track your project's performance with our highly-detailed monitoring system. With advanced remote sensing and AI technology, Treeconomy measures forests at the tree level, providing actionable insights for the long-term success of your investment.

Make your projects impact tangible

Communicate the impact of your nature restoration projects with our easy-to-understand data. We provide key metrics, impactful imagery, and visualizations for easy reporting, ensuring everyone is aligned with your goals and vision.
