

## Diffusion Alloys R&D

Advancing clean technology solutions by continuous advancement of protective coating solutions and validation methodologies

### Capabilities

- Working in parallel with clean-technology development programs and timelines
- Coating development programs
- In-house technical services
  - Metallographic & metallurgical
  - Atomic absorption spectrometry
  - SEM/EDX analysis
  - Micro/macro hardness testing
  - Oxidation resistance testing
  - XRF PMI
- Links to world class RTOs/Universities specialising in fuel cell, hydrogen research & nuclear research
  - Characterisation analysis
  - Testing & validation
