Our Global Capabilities

Leading UK, German and European Intellectual Property Specialists

Maucher Jenkins Offices

Maucher Jenkins is a leading Anglo-German Intellectual Property firm with multiple offices in the UK, Germany, Switzerland and China representing many well-known companies and brands globally.

Why Maucher Jenkins?

Maucher Jenkins is one of only a few leading IP firms with established offices in the UK, Germany, Switzerland and China.

Our attorneys have significant experience in a wide range of technologies. We exist to help turn those ideas and innovations into commercial success for their owners.

With the growth of global trade it has become increasingly important for businesses to establish distinctive products and services by way of innovation, design and branding. Our team of talented attorneys and lawyers act directly before the UKIPO, German PTO, EPO, EUIPO, WIPO and UPC on behalf of worldwide clients covering all IP matters.

As an international team of patent and trade mark attorneys, attorneys at law and intellectual property litigators, we act for many advanced companies globally; companies which set the pace in science, technology and innovative product design; advising on both non-contentious and contentious IP matters.

We recognise that all successful businesses started out small and were created from the ideas and dreams of one or more imaginative people. That's why our clients range from individual inventors and entrepreneurs, early stage and start-ups, SMEs up to international corporations. Every client, regardless of size, is as important as the next.

Our track record, expertise and local knowledge in the IP field ensures that we deliver cost-effective, seamless, high quality legal advice. Our strong teamwork and uniform approaches are vital to ensuring that global filing programmes are managed as effectively as possible. Efficient working practices and commercial pricing enable us to 'deliver more for less'.

The team is very professional, reliable, knowledgeable and always makes itself available quickly. A pleasure to work with.

Chambers & Partners, Intellectual Property: Patent & Trade Mark Attorneys

The UK

Our **UK attorneys** are recognised experts in intellectual property law, science and technology. They work across all industry sectors and are skilled at protecting and enforcing our clients' IP.

Our firm was originally established in London in 1937.

Our London office, which includes our UK litigation team, is based near Westminster and Buckingham Palace, the political and cultural heart of London. It provides easy access to the UKIPO, the High Court and the Intellectual Property Enterprise Court, as well as the tech and finance hubs of central London. With clients ranging from large international corporates to young SMEs, our London office operates on an international level.

We also offer the full range of patent, trade mark and design services from our Farnham office which was opened in 2012. Our Surrey-based team allows us to serve our Surrey, Hampshire and South of England clients.

Germany

We have highly trained patent attorneys, trade mark attorneys and intellectual property support staff operating out of both our **Freiburg** and **Munich** offices. Our attorneys and staff provide searching, clearance, drafting, filing and prosecution services to our clients across a wide range of industry sectors in Germany.

Our Freiburg team was established in the 1930s and is located in the Wiehre district in the centre of Freiburg-im-Breisgau, in the South West of Germany. Freiburg is situated in the Black Forest region of Germany, close to the French and Swiss borders. Its thriving university provides a backdrop of innovation and creativity for our attorneys' work. Freiburg and the surrounding Black Forest region are a hot spot for state-of-the-art development of medical devices, laboratory equipment and measurement technology and a well established centre of suppliers to the automotive industry.

Our Munich team was set up in 2003, and has developed into a thriving, international practice. Our office is located in the Old Town and Lehel districts at the centre of the city. A short distance along the river Isar from our office location, is the European Patent Office (EPO). This proximity enables all our attorneys to maintain good contact with examiners at the EPO by regularly attending interviews, opposition proceedings and appeals.

Switzerland

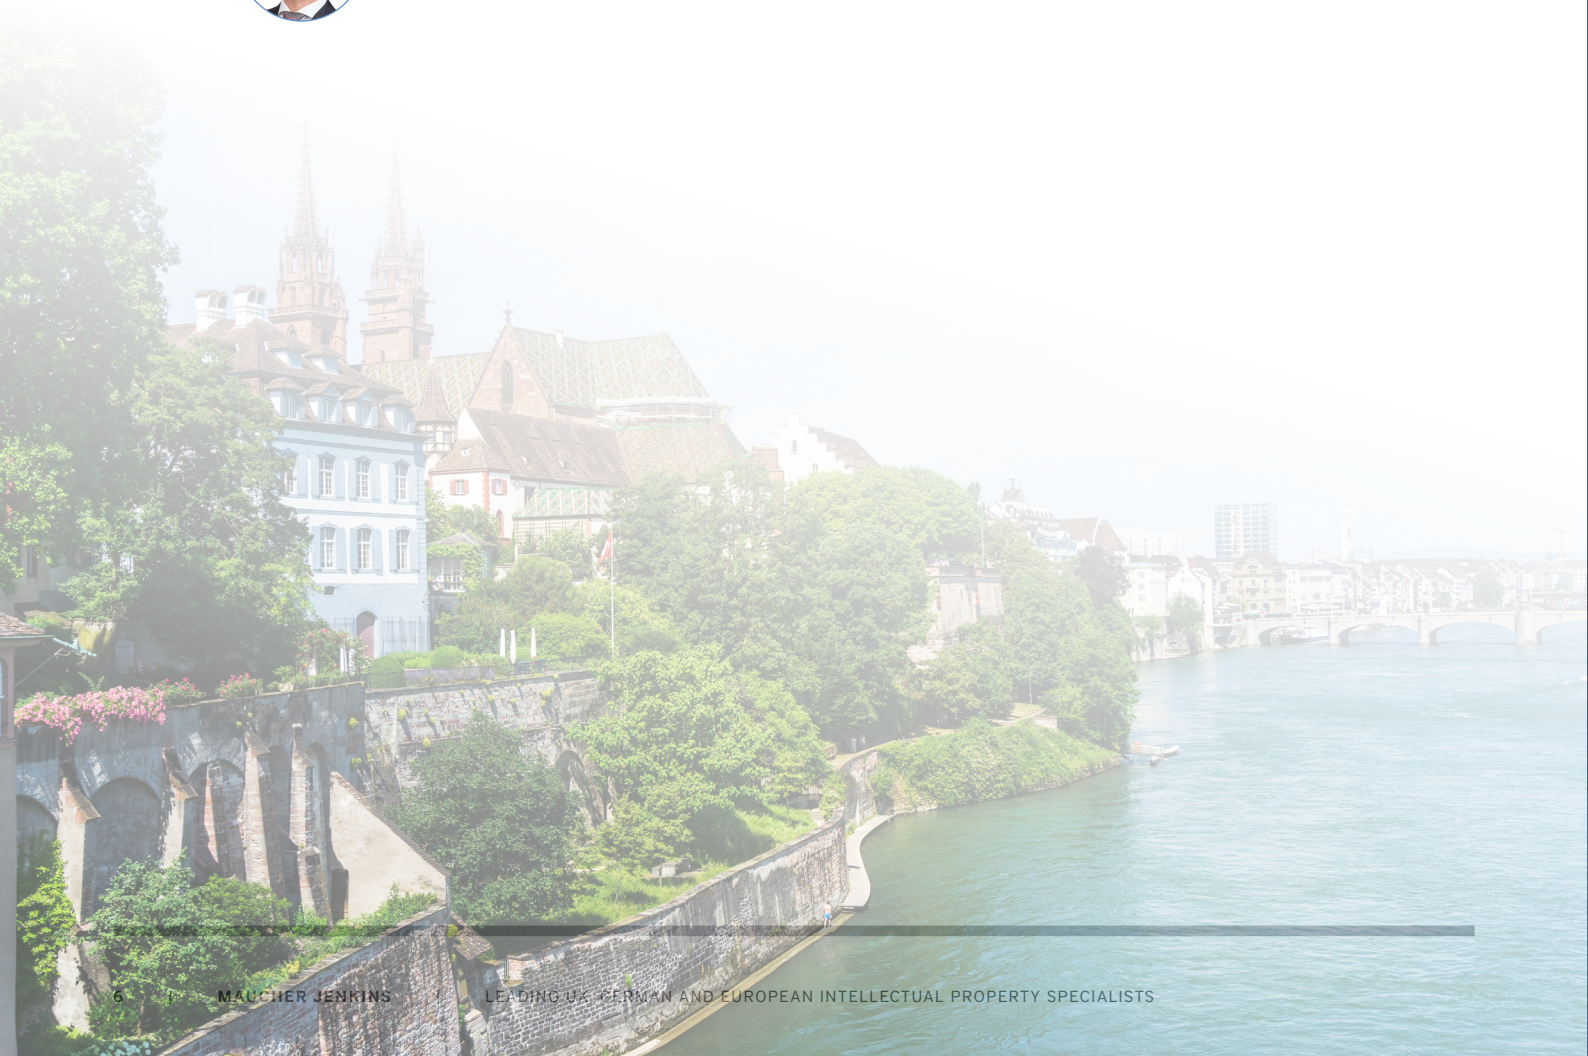

Our office in **Basel** is ideally placed where Germany, France and Switzerland come together.

Our Swiss patent attorneys undertake work including patent drafting, patent prosecution, and litigation and conflict resolution across a range technical sectors. We also advise on and file Swiss trademark applications.

China

The **inside knowledge** of China's Intellectual Property system that our attorneys provide is essential for any business wishing to begin trading in the world's largest economy.

Our Beijing team of patent attorneys and trade mark attorneys is based in the North of the city, east of a virtual central line going through the Forbidden City and the middle point between the Bird Nest and the Water Cube. Since its opening in 2012, our office in Beijing has been a vital support to our offices in London and Munich. The team is also supported by staff in our offices in the UK and Germany to ensure a seamless service inside and outside China.

Our team in Shenzhen helps Chinese clients navigate the IP processes outside China. They also enable technology transfer from foreign clients into the country. Shenzhen is nick-named China's 'Silicon Valley' because of the number of high-tech companies headquartered there. Our office enables our attorneys to serve these companies.
