LAYER VISUAL ACUITY

CREATE UNIFIED SPATIAL EXPERIENCES

FRANK GEHRY!

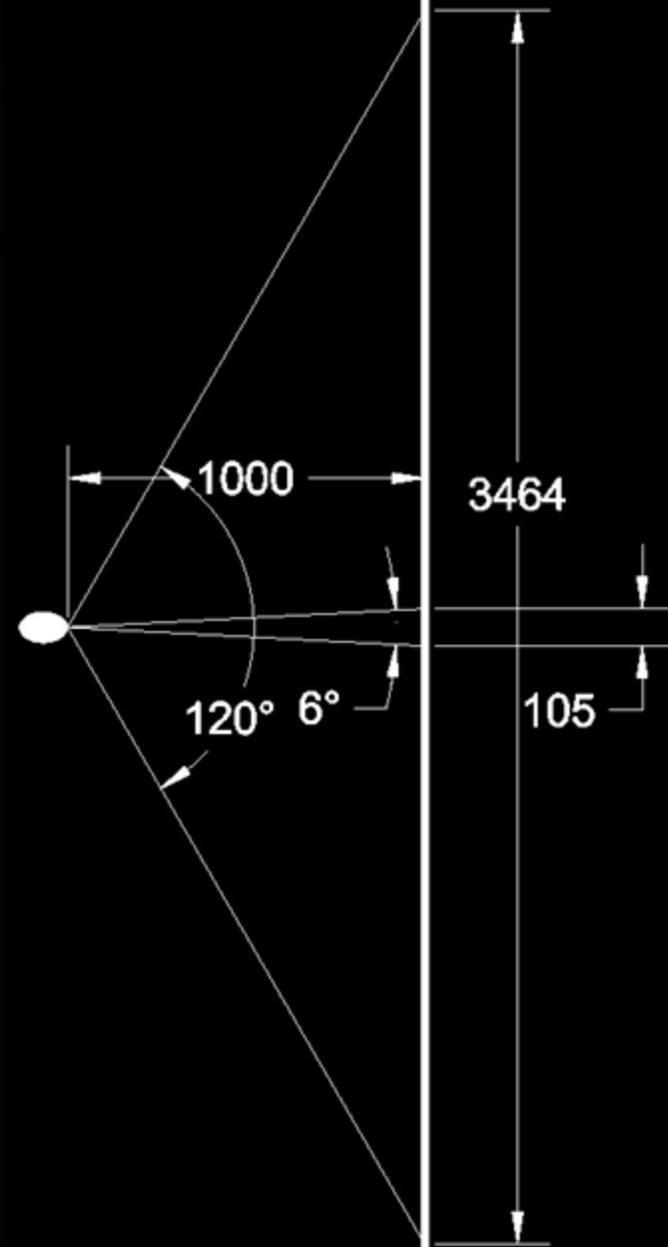

EVEN BETTER THAN THE REAL THING

RETINA QUALITY = 1 METER @ 0.5MM PIXEL PITCH

HUMANS HAVE A TOTAL HORIZONTAL FIELD OF VIEW OF ROUGHLY 210-DEGREES WITH BINOCULAR FIELD OF ROUGHLY 120-DEGREES AND A HIGH-ACUITY CENTRAL VIEW OF 6-DEGREES

AT 1 METER WITH A FIELD OF VIEW OF 120-DEGREES, HUMANS CAN SEE 3,464MM OF HORIZONTAL WIDTH. REQUIRING 60 PIXELS PER DEGREE FIELD-OF-VIEW, THAT REQUIRES $60 \text{ PIXELS} \times 120 \text{ DEGREES} = 7,200 \text{ PIXELS}$ PER 3,464 MM OF WIDTH, OR A PIXEL PITCH OF $3,464\text{MM}/7200 \text{ PIXELS} = 0.48 \text{ MM PITCH}$

AMBIENT COMMUNICATIONS

Preattentive Processing:

- Fast
- Uses long-term memory
- Hue, intensity, flicker, direction of light & motion

Attentive Processing:

- Slow
- Uses short-term memory

ARCHITECTURE AS
A PORTAL TO THE
VIRTUAL WORLD

relationship of a body to an interactive luminous environment

	SURFACES	ZONES	OBJECTS
EYES	 Cone of vision relationships provide hierarchies of groupings/divisions	 Visual qualities of surfaces create perceived overlapping zones	 Visual points of highlight combine to form matrices
BODY	 Surfaces define edges of zones that bodies move within/against	 Progression of body through zones manipulates surfaces and objects	 Objects have bodily presence that mirror the human body
HANDS	 Surfaces only pressable, not graspable	 Zones at the scale of hands allow precision, definitive control	 Graspable objects provide points of tangible contact

relationship of light to space

	SURFACES	ZONES	OBJECTS
LUMINOSITY	 Luminous presence attracts people to look inward to the plane	 Light emanating from surfaces creates zone conditions	 Luminous presence attracts people with 3D zone around object
COLOR	 Differentiates between surfaces; Suggests emotive meanings	 Overlapping colors create additional zone conditions	 Differentiates between surfaces; Suggests emotive meanings
TEXTURE	 Produces an enhanced presence with complex variations over time and emotive meaning	 Spatial texturing of zones produces points, lines and gradient conditions of sensing	 A matrix of objects produces unique spatial textures
DYNAMICS	 Change of meanings over time: direct change of emotive meaning and change of visual relationships	 Spatial moments may change connection to surface/object attributes via sensing to change spatial activity attributes	 Change of meanings over time: direct change of emotive meaning and change of visual relationships

'The Big Idea'

Cooler Screens is creating the world's largest digital media platform for retail by tapping into a massive opportunity to monetize the consumer traffic at the point-of-sale in brick-and-mortar.

COOLER MEDIA PLATFORM

With digitized planograms, products will never look disorganized, hidden or out of stock again.

- Convergence of brick-and-mortar with e-commerce
- Real-time and algorithmic pricing and promotions
- Smart-sensor and digital merchandising for planogram compliance, automatic-restock, in-store audits, etc.
