WELCOME

Techno-Ethics

Why it is important to think about the societal impact of (educational) technology on humans and society

(and how to put those thoughts to action!)

Presentation ISE EdTech Summit Barcelona February 2023
Jo-An Kamp, Fontys University of Applied Sciences, School of IT

Assignment

- I will show you a video prototype from a first year ICT and Media Design student
- Please write down everything you see that can be explained as either *good* or *not so good* (for now and in the future)

(The video is 2.30 minutes long. Prepare for a quick shout out afterwards. Let's go!)

Recap: Shout out

good?

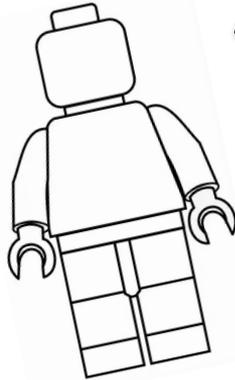

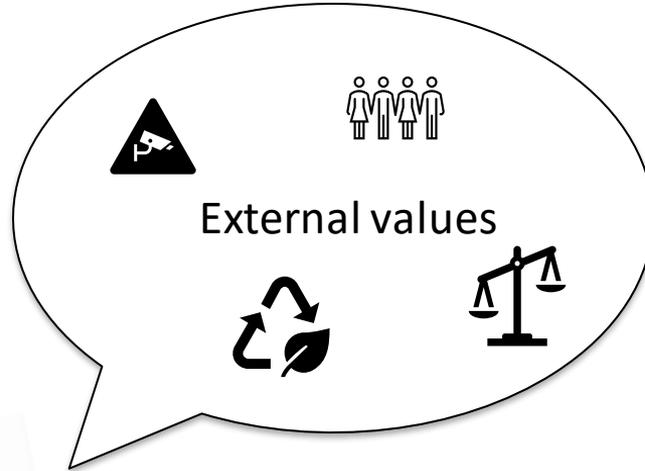

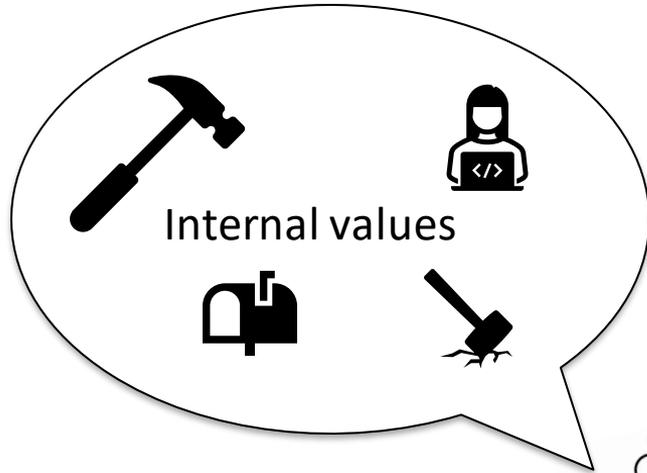

poor, bad, ill, worse?

"The more Artificial Intelligence enters our lives, the more essential Ethics & Philosophy become."

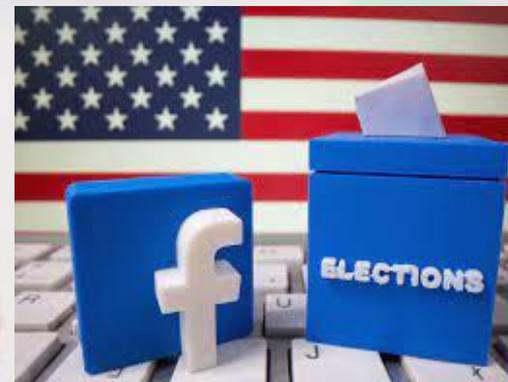

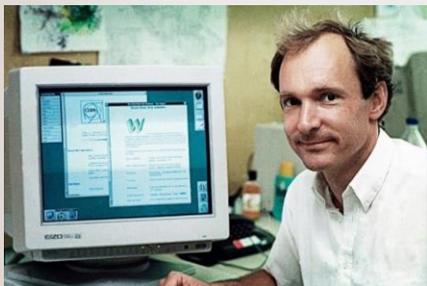

(THE AI THOUGHT BOOK)

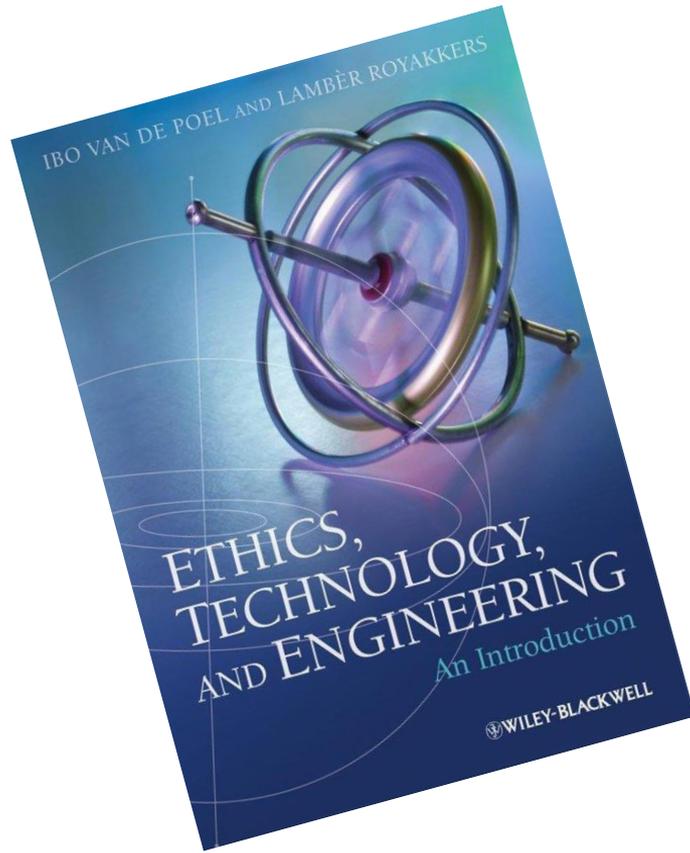

Engineers have a natural tendency towards internal values

*“those who create new technology should
internalize the external (terminal) values
in order to design meaningful innovation”
Ibo van de Poel, 2015*

Avoid becoming a 'tech regret'

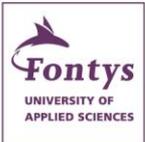

Introduction

One of the **main differences between science and engineering is that engineering is not just about better understanding the world but also about changing it.** Many engineers believe that such change improves, or at least should improve, the world. In this sense engineering is an inherently morally motivated activity.

“We become what we behold. We shape our tools and thereafter our tools shape us”

Marshall McLuhan
(but actually John Culkin)

TECHNOLOGISCHE MENS

↓

ETHISCH FRAMEWORK

INLEIDING: WAAROM DIT PROJECT?

Waarom is techniekgebruik niet neutraal? Hoe kan techniek de menselijke natuur veranderen? Hoe kan techniek de menselijke natuur veranderen? Hoe kan techniek de menselijke natuur veranderen?

DE ETHISCHE DISCUSSIE

Wat is de ethische discussie? Hoe kan techniek de menselijke natuur veranderen? Hoe kan techniek de menselijke natuur veranderen? Hoe kan techniek de menselijke natuur veranderen?

ANIL JASPERIS: TECHNIEK ALS NEUTRAAL MIDDEL

Techniek is het op zijn best en ook op zijn slechtste een neutraal middel. Het is de mens die de techniek gebruikt om zijn doelen te bereiken. De mens is de drijvende kracht achter de techniek. De mens is de drijvende kracht achter de techniek. De mens is de drijvende kracht achter de techniek.

MARTIN HIBBERGER: TECHNIEK ALS DEINER

Techniek is het op zijn best en ook op zijn slechtste een deiner. Het is de mens die de techniek gebruikt om zijn doelen te bereiken. De mens is de drijvende kracht achter de techniek. De mens is de drijvende kracht achter de techniek. De mens is de drijvende kracht achter de techniek.

PETER PAUL WIRREBEEK'S METACON THEORY

Metacontheorie is een theorie over theorie. Het is een theorie over theorie.

MENADE IN CONTEXT

Menade is een theorie over theorie. Het is een theorie over theorie.

DE ETHISCHE DISCUSSIE

Wat is de ethische discussie? Hoe kan techniek de menselijke natuur veranderen? Hoe kan techniek de menselijke natuur veranderen? Hoe kan techniek de menselijke natuur veranderen?

ANPWK / TO BE CONTINUED

ANPWK is een theorie over theorie. Het is een theorie over theorie.

From theory to practice...

AN ETHICAL TOOLKIT FOR THE DEVELOPMENT OF AI APPLICATIONS

The designed ethical toolkit, in the form of a "full-day" modular workshop, assists in the generation of ideas and supports dialogue for an ethical development of AI applications. Furthermore, its seven modules provide a basis for discussion, trigger solutions, and visually communicate the topics of AI ethics to development teams and clients in a creative and collaborative fashion.

STAGE 1 - ETHICAL ALIGNMENT

Ethics & [AI] Mini-workshop

The Evil in [AI] Game

AI Project General Checklist

The Responsible Artificial Intelligence Deck

Ethical Risks Cards

Ethical Evaluation Axes

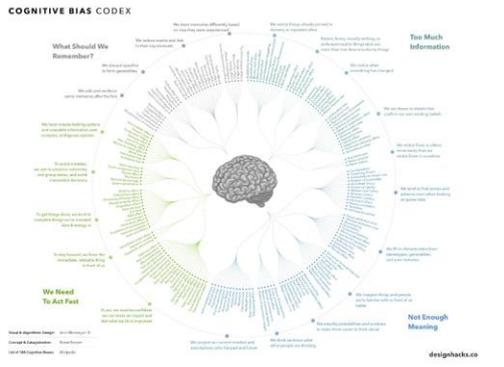

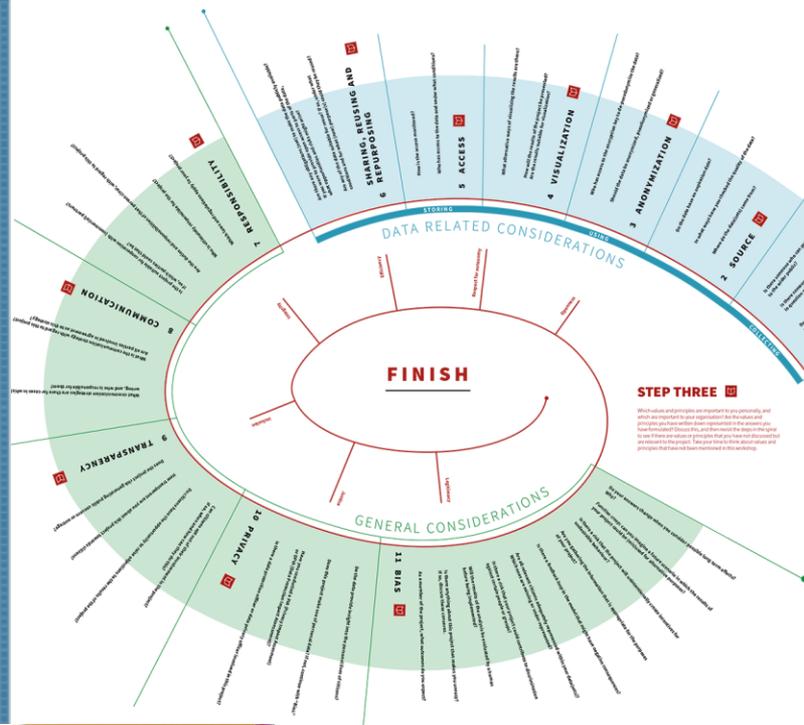

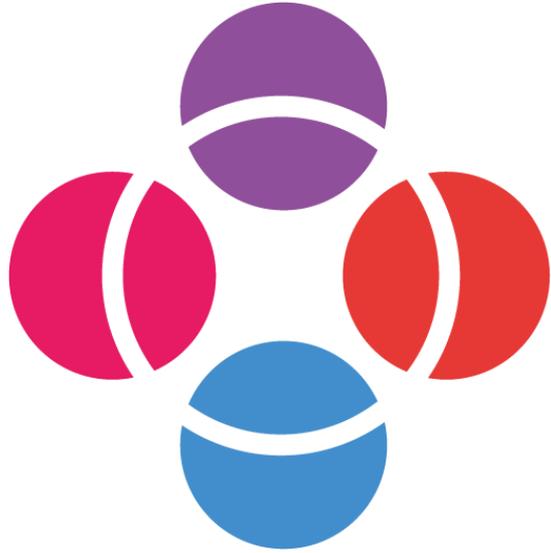

Moral Code of the Project

STAGE 2 - PROJECT VISION & VALUES

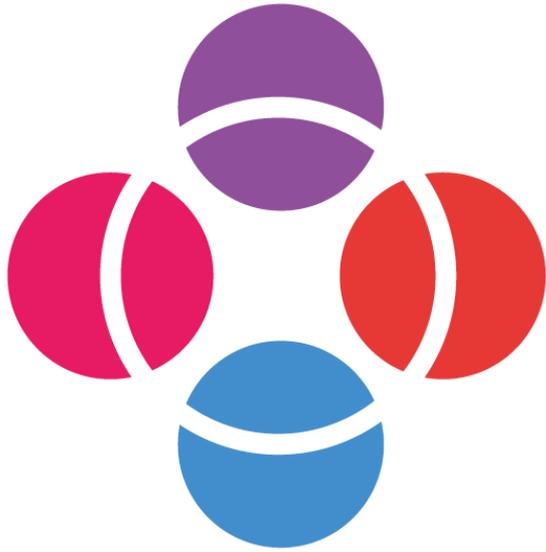

STAGE 3 - MORAL CODE OR BEST PRACTICES

TICT

Technology Impact Cycle Toolkit

TICT

**A FREE TOOLKIT THAT HELPS PEOPLE
TO MAKE BETTER DECISIONS
ON THE IMPACT OF TECHNOLOGY**

WWW.TICT.IO

Starting points while developing the tool:

1. Technology = multidisciplinary
2. Ethics as a driving force for innovation
3. Non-judgmental (you can be as good/evil as you want)
4. Part of the (design cycle) process
5. Context is king

Questions, a lot of questions...

Did you make any changes to the design of your technology because of these questions?

In what way is your technology contributing to a world you want to live in?

How could bad actors use your tech to subvert or attack the truth?

Does your technology register personal data? If yes, what personal data?

How does the technology influence the user(s) ability to make his/her own decisions?

Did you consider all stakeholders, even the ones the might not be your user or target group, but still might be of interest?

In what way do you consider the fact that data is collected from the users?

Is your technology fair for everyone?

Does your technology have a built-in bias?

Are your algorithms transparent to the people impacted by them?

Is your technology environmentally sustainable?

Did you consider future impact?

Impact

Bad actors

Privacy

Human values

Stakeholders

Data

Inclusivity

Transparency

Sustainability

Future

What impact is expected from your technology?

Impact on society

Importance: **Very important**

Quality: **Very good**

What can bad actors do with your technology?

Hateful and criminal actors

Importance: **A lot**

Quality: **Very good**

Are you considering the privacy & personal data of the users of your technology?

Privacy

Importance: **Very important**

Quality: **Can be better**

How does the technology affect your human values?

Human values

Importance: **Very important**

Quality: **Good enough**

Have you considered all stakeholders?

Stakeholders

Importance: **A lot**

Quality: **Good enough**

Is data in your technology properly used?

Data

Importance: **A little**

Quality: **Good enough**

Is your technology fair for everyone?

Inclusivity

Importance: **A lot**

Quality: **Good enough**

Are you transparent about how your technology works?

Transparency

Importance: **A lot**

Quality: **Good enough**

Is your technology environmentally sustainable?

Sustainability

Importance: **Not important**

Quality: **Good enough**

Did you consider future impact?

Future

Importance: **A little**

Quality: **Good enough**

Edtech for a Changing World

Creating an experimental EdTech cycle

TICT

- Focuses more on Societal level and large questions
- Used for any technology

➤ Could we narrow the use to just Educational Technologies in Education?

Public values in EdTech

Humanity

Meaningful Contact

Social Cohesion

Well-Being

Justice

Equal Opportunity

Equal Treatment

Inclusivity

Autonomy

Freedom Of Choice

Independence of
Education

Questions, a lot of (EdTEch) questions...

How will this new technology affect
Social Cohesion?

How will this new technology affect
Meaningful Contact?

Did you make any changes to the design of your technology because of these questions?

How does the EdTech impact
self-determination of students?

How does the EdTech impact
self-determination of teachers?

How does this tool impact
equal opportunity?

How is your technology going to solve the problem?
What impact is expected from your technology?

How does the EdTech affect
humanity?

Humanity

Importance: **Very important**

Quality: **Good enough**

How does the EdTech affect
autonomy?

Autonomy

Importance: **Very important**

Quality: **Very good**

How does the EdTech affect
justice?

Justice

Importance: **Very important**

Quality: **Can be better**

How will the EdTech make things
better?

Impact

Importance: **Very important**

Quality: **Good enough**

Pandora case...

Pandora is a new tool to refresh your curriculum!

Pandora is designed to gamify any learning materials that are imported into it. The technology has two sides, the 'back-end', which teachers use for their interface and the 'front-end' for students to see.

The back-end allows for teachers to generate games from a variety of topics including math problems, engineering situations or even story problems. Pandora uses AI methods to read text and generate small games such as: Tic-tac-toe, matching puzzles, new stories, or moving animations that can be interacted with, such as physics puzzles. The Pandora application generates not just the game, but also a 'leader board', other similar problems, and 'how-to-play' instructions. By gamifying any learning material, Pandora enables more engagement and more fun in learning! It saves time by turning boring reading material into an engaging animation in just a click!

-Pandora is a speculative tool, not on the market-

Pandora case...

- Pandora saves teachers time by making things easier and quicker
- Playing games might be more engaging than reading boring articles
- Leader board can boost student's well-being if they win or compete
- More engagement with the learning material might improve learning
- Accessible for everyone!

- Gamification could possibly overrule teacher autonomy
- Increased presence of devices might reduce empathy and trust
- Students might feel they always need to 'win' a game in order to learn
- Students can use tools like ChatGPT for essays and to pass an exam
- Might not be inclusive enough!
