

## **INCOM GROUP AWARDED BY TPI COMPOSITES AS BEST RATED PROVIDER IN LEAN ADVANTAGE SOLUTIONS**

[Alicante, 10/12/2024] – InCom Group is pleased to announce that it has been recognized by TPI Composites, a global leader in the manufacturing of wind turbine blades and advanced composite solutions, as the Best Rated Provider in Lean Advantage Solutions of the year. This award highlights InCom Group's ability to deliver strategic solutions that drive sustainability and efficiency in its clients' projects.

The collaboration between InCom Group and TPI Composites, which began several years ago, has resulted in the development of numerous innovative projects focused on sustainability. Thanks to its deep expertise and dedication, InCom Group has provided high-value-added solutions that have been crucial in raising the level of sustainability in their joint projects. This recognition reinforces its position as a trusted strategic partner, capable of turning complex challenges into sustainable opportunities for the future.

InCom Group's ability to provide strategic and sustainable solutions is key to the success of its projects. The company has demonstrated great skill in identifying and developing the necessary tools to enable its clients to move toward a more sustainable future, significantly contributing to the success of the most challenging projects in the wind energy sector and other related industries, such as Marine and Mobility, which require advanced solutions in composite materials.

InCom Group remains committed to its mission of helping its partners achieve maximum levels of sustainability in their operations, both in terms of competitiveness and environmental impact. This award, received by Mr. Carlos Vidal (President) and Mr. Luis Azorín (General Director), reaffirms its role as an essential strategic supplier, capable of delivering reliable solutions that not only improve efficiency and profitability but are also aligned with the growing global sustainability challenges.

### **About InCom Group**

InCom Group is a leading provider of strategic solutions, focused on the engineering, design and manufacture of composite material solutions for projects in the wind, marine, transportation, and industrial sectors. The company stands out for its ability to develop comprehensive solutions that add value and help its clients achieve their sustainability goals.

### **About TPI Composites**

TPI Composites is one of the largest independent manufacturers of wind turbine blades worldwide and a leader in the development of advanced composite materials. With its commitment to sustainability, TPI works to create a greener and more energy-efficient future.
