

svismold®: Pioneering Thermoplastic Composite Solutions at JEC 2025

Buchs, Switzerland – January 2025

svismold®, a leading innovator in the development and production of thermoplastic composite components, is proud to announce its participation in JEC World 2025, the global platform for advanced composite materials and technologies. This marks a significant milestone for the company as it continues to expand its impact across industries including sports, industrial applications, and beyond.

Showcasing Expertise and Innovation

At JEC 2025, you will find more information about svismold® at the Composite United stand **6R24**. With expertise in applications ranging from high-performance sports equipment to complex industrial components, the company offers tailored solutions that push the boundaries of technology and performance.

Among its most recognized innovations is the **H4 Surf Fin**, developed in collaboration with FCS, showcasing the company's dedication to combining lightweight design, durability, and top-tier performance. Additionally, the company's technical solutions, such as wear-resistant components like milling cutters, demonstrate its versatility and capacity to meet the needs of a wide range of industries.

Sustainability as a Core Value

In an era where sustainability is a key driver of innovation, svismold® has embraced environmentally conscious practices throughout its operations. From material selection to production processes, the company strives to reduce its ecological footprint without compromising on quality or performance.

Collaboration at the Heart of Success

svismold's success is rooted in its collaborative approach. By working closely with clients, partners, and research institutions like the Institute of Materials Technology and Plastics Processing (IWK) and the Eastern Switzerland University of Applied Sciences (OST), the company ensures that every solution is precisely tailored to meet specific requirements and industry challenges.

Explore the Possibilities

At JEC World 2025, svismold® invites industry professionals to explore its comprehensive approach to thermoplastic composites. From concept to serial production, the company partners with clients to turn ideas into reality, ensuring solutions are precisely tailored to meet their unique needs.

Visit us at JEC World 2025 to discover how svismold® can drive your next innovation. Let's shape the future of composites together!
