

## **CNC Robotics to showcase its advanced machining and additive robotics applications at JEC 2024**

February 1, 2024 – CNC Robotics, a leading integrator specializing in machining and additive robotic applications, will be exhibiting at JEC 2024, the largest composites exhibition in Europe. The event will be held from March 5-7, 2024, at the Paris Nord Villepinte Exhibition Centre in Paris, France.

As a member of Composites UK, CNC Robotics will be located in the UK pavilion, Hall 6, Stand S62, where the company will showcase its innovative solutions for composites and plastics manufacturing. With over 15 years of experience in the field, CNC Robotics has established itself as a trusted partner to businesses looking to automate their manufacturing processes, increase efficiency, and reduce costs.

Visitors to the CNC Robotics stand will have the opportunity to learn about the company's advanced robotic solutions for machining and additive manufacturing. The company's innovative systems are designed to improve accuracy, speed, and quality, while also providing flexibility and scalability to meet the needs of any production environment.

"We are thrilled to be exhibiting at JEC 2024, and to have the opportunity to showcase our expertise and capabilities to a wider audience," said Jason Barker, CTO of CNC Robotics. "Our advanced robotic solutions are designed to help composites and plastics manufacturers achieve greater efficiency and quality, while also reducing their environmental impact. We look forward to meeting with customers and partners at the show to discuss how we can help them achieve their manufacturing goals."

With its commitment to innovation and customer satisfaction, CNC Robotics has become a leading provider of robotic solutions for composites and plastics manufacturing. The company's participation at JEC 2023 is a testament to its dedication to the industry and its customers.
