

Innovative Thermoplastic Composites Solutions Unveiled by svismold® at

JEC World 2024

svismold®, a leading innovator in the development and production of tailored thermoplastic composites solutions, is set to showcase its cutting-edge offerings at the JEC World 2024 in Paris.

About svismold®: svismold® specializes in crafting high-end thermoplastic composites solutions designed for diverse applications, with a primary focus on the sports industry. The company is renowned for its commitment to innovation, precision engineering, and pushing the boundaries of what's possible in composite materials.

JEC World 2024 Participation: svismold® is thrilled to announce its participation in the JEC World 2024, a major event for the composites industry. The company will be exhibiting under its brand, showing groundbreaking solutions that demonstrate the intersection of technology, performance, and sustainability. We will exhibit at the Composite united booth. You'll find us in Hall 6, P24.

Key Highlights:

Tailored Solutions: svismold's showcase will feature individualized thermoplastic composites solutions, tailored to meet the unique demands of the sports industry. These solutions are also adaptable for various technical applications.

Innovated Perfection: svismold® develops unique solutions and ensures highest quality. With FEM analysis the company test the possibilities and materials for perfectly fitting solutions.

Sustainability Focus: svismold® remains committed to sustainable practices. Learn about the company's initiatives to minimize environmental impact while delivering top-notch performance in composite materials. We offer solutions with natural and sustainable materials for a better future.

Serial Production: svismold® offers not only unique parts tailored to our customer's needs, but they also produce in serial. Therefore, material and time can be efficiently used.

At the heart of svismold's showcase are its individually tailored thermoplastic composites solutions. These solutions, meticulously crafted to meet the unique demands of the customer, exemplify the company's commitment to pushing the

envelope in thermoplastic composite parts. From lightweight components to advanced structural elements, svismold's offerings showcase a perfect blend of innovation and functionality.

Technical Versatility: While svismold® has carved a significant niche in the sports industry, the company's technical expertise extends far beyond the athletic arena. The versatility of svismold's solutions makes them applicable to a myriad of technical sectors. Whether it's aerospace, automotive, or any other industry seeking advanced composite materials, svismold® has the expertise to address diverse challenges and opportunities.

Meet the svismold® Team: Visit svismold® at Booth P24 in Hall 6 during JEC World 2024 to engage with the team, explore product offerings, and discover how svismold's innovative solutions can elevate your projects.

Contact Information:

svismold - Kunststoffwerk AG

Rheinaustrasse 7

CH-9470 Buchs

About svismold®: Since 1970 we are well established in the plastic industry as Kunststoffwerk AG. With the focus of thermoplastic composites projects the brand svismold® was established in 2018. The company offers unique and individual thermoplastic solutions. They work with partners such the IWK, Institute for Materials Technology and Plastics Processing for precise analysis to meet their customers needs. With a focus on innovation, precision engineering, and sustainability, svismold® is a trusted partner for companies seeking advanced solutions in composite materials.
