iCOMAT FACTORY II | Swindon, UK

40,000
sq ft

20
CNC Machines

4
Autoclaves

2
Ply Cutters

Fully Equipped
Metrology Lab

ICOMAT is pleased to announce the opening of FACTORY II, a 40,000 sq ft manufacturing facility located in Swindon, UK. With this addition **ICOMAT will operate one of the largest composite manufacturing footprints in the UK**, incorporating cutting edge fibre-steering technology and a vertically integrated approach to production.

The facility brings substantial new capability in both tooling production and the manufacture of complex assemblies, strengthening the company's position as a leading technology and production partner in advanced composites.

This strategic expansion significantly enhances iCOMAT's ability to deliver world class composite parts and provide a true end-to-end service for its customers.

"Factory II removes the limits of scale. From raw material to final assembly, it all happens under our roof."

Evangelos Zypeloudis
Founder & CEO, iCOMAT

"Factory 2 will not just provide greater processing capacity but avail us of some of the most skillful Technicians in the industry dedicated to upholding the quality values that sit at the heart of iCOMAT's ethos."

Keith Fairbrass
Managing Director, iCOMAT
