

Millboard launches 'DuoKit'

Revolutionary subframe system now available in five simple kits

Millboard's ground-breaking [DuoSpan](#) landscaping system was launched earlier this year to a chorus of praise from installers and homeowners alike. Lauded as 'stable, technically advanced and superior in every way', the landscaping solution makes light work of even the most complex of decking designs.

Now Millboard has made life even easier by offering five 'off the peg' [DuoKits](#), each containing every component needed for a complete and straightforward DuoSpan subframe installation. Millboard's product development team is always thinking of ways to make installation as simple as possible, and with the five new DuoKits, homeowners will have peace of mind from the outset that they have everything required for assembly.

What are DuoKits made up of?

DuoKits each contain a set amount of DuoSpan 51mm joists, joist inserts and angle brackets. The kit sizes range from 1200 x 3614mm to 3614 x 5400mm, and multiple kits can be purchased and combined for larger scale projects. DuoSpan is a unique landscape construction frame, combining the strength of aluminium with the design flexibility of recycled plastic. This combination enables distinctive design opportunities for decking and outdoor structures that would be impossible with conventional subframes.

Millboard has carefully developed each DuoKit option for use in residential applications. For commercial applications, installers should refer to the guidance in the Millboard DuoSpan and DuoLift [installation guide](#).

Each DuoKit is designed to work perfectly with Millboard's [Enhanced Grain](#) decking range, and all colours from the collection are available. Boards can be ordered as an additional purchase, as well as edging and fascia boards, and they will be supplied in full lengths with the correct number of fixings needed to use in conjunction with DuoKit.

DuoKits can also be used in conjunction with Millboard's DuoLift cradle system for straightforward installation on hard surfaces.

DuoKits are now available in the following size options:

- Kit 1:** 1.2m x 3.6m (KK1236), exact size with boards – 1200 x 3614mm
- Kit 2:** 1.8m x 3.6m (KK1836), exact size with boards – 1804 x 3600mm
- Kit 3:** 2.4m x 2.4m (KK2424), exact size with boards – 2347 x 2400mm
- Kit 4:** 3.6m x 3.6m (KK3636), exact size with boards – 3614 x 3600mm
- Kit 5:** 3.6m x 5.4m (KK5436), exact size with boards – 3614 x 5400mm

With DuoKit, there's no guesswork involved. Enquire with your [local stockist today and](#) give your dream deck the very best support with DuoKit. For more information, please visit: <https://www.millboard.co.uk/duokit/>
