

PRESS RELEASE

NEW BRUSHED BRASS COLLECTION

Forbes & Lomax has become synonymous with elegant light switches inspired by the late Victorian era and the art-deco period. Forbes & Lomax are world-renowned for their classic collection of lightswitches and sockets and are now launching their highly anticipated new finish.

Joining the original Invisible collection, Unlacquered Brass, Nickel Silver, Antique Bronze, Stainless Steel, Aged Brass and Verdigris, Forbes & Lomax are very excited to introduce their new **Brushed Brass** range in the UK.

The Brushed Brass has fine vertical brush marks creating a matte effect for a subtle finish, which adds a unique and contemporary twist to the Forbes and Lomax range. These plates are lacquered for a wear resistant finish.

Toggles, dimmer knobs and push buttons are available as well as sockets giving a streamlined, classic feel to the design. Socket inserts are only supplied with black inserts to complement the quality of the Brushed Brass finish.

Forbes & Lomax offers a full range of British made switches, dimmers and sockets in all their finishes with all plates handcrafted in the UK and assembled in the Forbes & Lomax workshop in South West London. The focus for their designs has always been understated elegance and the Brushed Brass range is the perfect addition to their collection, capturing the essence of English style.

Notes to editors:
