

## Introducing Link bench at CDW 2020 - Design Fields stand DF43

Making its debut at Clerkenwell Design Week is OMK's latest modular seating system, Link. A moulded polyurethane seat with a unique geometric shape which can be combined to create multiple dynamic layouts.

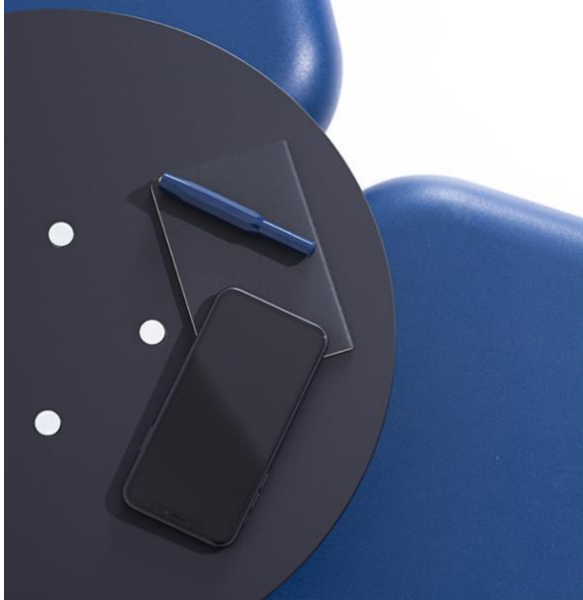

A simple linking device can be quickly removed and reattached allowing for easy reconfiguration. Base units can be combined with optional accessories to create an endless number of layouts.

## *MATERIALS*

Designed specifically for high use applications, Link has an integral steel frame which sits inside a moulded polyurethane seat panel. Powder coated or stainless steel legs are attached to the frame creating a modular unit with a 25 year guarantee.

## *COLOURS*

Link is offered in any RAL colour, making it perfect for any type of educational, corporate or public environments. The legs are available in powder coated matt black or in stainless steel.

## ACCESSORIES

The modular design incorporates a range of optional accessories, including dividers, tables and charging points available with all international sockets and USB A or C.

### Notes to editors

About OMK 1965:

Founded in 1965 by Rodney Kinsman RDI, OMK designed and manufactured much of the furniture sold through Sir Terence Conran's Habitat stores in the 60s and 70s.

A key figure in the High-Tech design movement, Kinsman's products are regarded as icons of 20<sup>th</sup> century British design.
