

Alea launch Q18 - most striking and functional modular storage

Alea will show their Q18 range which offers unrivalled flexibility, in terms of module, accessories, and finishes, in the highest showroom in Clerkenwell, with terrace views across the Design District.

It punctuates areas beautifully and gives a chance to mix practical drawers, cupboards and shelving, that gives an opportunity to personalise an area, and inform.

Clever design delivers heights compatible with sitting and standing height work surfaces which it supports. In addition to being freestanding, Alea Q18 offers mobile options and ceiling fixing, especially useful for public and educational applications.

Importantly Alea make it easy to design with a bespoke configurator, and it's rigid enough to be delivered in sections prebuilt to make installation a breeze.

Finally the amazing Alea colour palette of finishes is available in Q18.
