

Studio TK Introduces Jotta, a Sophisticated Alternative to Office Seating

The chair's thin, natural profile and versatile design make it a practical choice for various work positions

September 23, 2024

Today, Studio TK announced the launch of Jotta, a sophisticated alternative to office seating. Designed for Studio TK by Estudi Manel Molina, Jotta is an office chair inspired by nature's beauty. The thin yet sturdy profile reflects the simple silhouettes existing in the woods of Molina's childhood home in Spain.

"We recognize that today's workforce doesn't want to be tied to a single space for an entire workday," states Koorosh Sharghi, President at Studio TK. "In fact, furniture should be freeing. As people continue to incorporate laid-back work settings into professional landscapes, it's important to offer transitional, multi-use furnishings that work with, and not against them."

Jotta's versatile design makes it a practical seating choice for various work positions—from fixed to casual to mobile—ensuring comfort while also providing proper support. The chair's familiar shape embodies both beauty and functionality. Jotta's upholstered seat offers a soft, casual embrace, making it a satisfying

choice for the several work positions people experience throughout the day. Whether it's focused concentration, organized collaboration, or impromptu social interactions with coworkers, Jotta's organic form is welcoming.

"The graceful arch of the cantilever arm reminds me of pine boughs," reminisces Manel Molina, Founder of Estudi Manel Molina. "These natural elements are not only inspirational but also a logical part of the design process. Nature's recognizable characteristics provide functional forms and inspire beauty, connecting us to the natural world."

Jotta's is available in a cantilevered or looped aluminum arm with a fully upholstered seat. Paired with a four-star swivel base on glides or adjustable five-star task base on casters, Jotta may be finished in any of Studio TK's Fundamental or Fashion metal finishes, and an expansive choice of textiles and leathers.
