

## **TENTE – Castors and wheels for furniture**

There are some significant terms which are closely associated with the word ‘mobility’: progress, movement, flexibility and drive. They all shape our modern lives and are essential for success and development. It is for exactly this reason that we at TENTE work on driving mobility forward every day. With our trailblazing castors and wheels, with uncompromising standards of quality and above all, with a clear brand promise: Better Mobility. Better Life.

TENTE has been developing smart mobility solutions since 1923. Solutions which noticeably improve people’s lives and their working environment. Solutions which increase productivity, ensure more safety and open up new horizons in matters of design, durability as well as environmental friendliness. No matter whether it’s for industrial, commercial, medical technology, heavy goods transport, mechanical engineering, intralogistics, factory equipment or the furniture sector, TENTE’s castors and wheels set new standards and put influential changes in motion. By doing this, we enjoy our customers’ confidence in our high quality product and innovative spirit, as well as our ability to provide close customer support on all five continents.

We are a globally operating company that offers you support on five continents. That means on the spot support with an equal opportunity service and in-depth support. Our staff not only understand the regional and industry-specific requirements, but also speak your language and are familiar with your country’s cultural practices.

Anika evo – the first castor product range made of plant-based material. Anika evo is made of up to 98%\* biomass materials originating from the castor bean. The Anika evo castor offers the same product quality and colour flexibility as the well-known Anika castor. In producing a sustainable furniture castor, TENTE is the first manufacturer ever to incorporate the castor bean into a furniture castor product range. The utilization of the castor bean helps us to reduce the carbon footprint by 46%\*\*.

TENTE’S DNA consists of developing and exploring new possibilities – product development for a more sustainable future is no exception. You can be a part of this sustainable journey!

BETTER MOBILITY. BETTER LIFE.

Anika evo is the perfect combination of sustainability and design - a green and sustainable solution that covers all needs and meets all your requirements without any compromises on functionality and quality.

In short – Anika evo is your way to a more green and sustainable solution without compromising on product quality, mobility and durability.

\*98% calculated from the total weight of synthetic material used to manufacture our product.

\*\*46% calculated according to the life cycle management ISO 14040 and 14044 standards
