Studio Haran Launch - The Sandscape Lighting Collection

Studio Haran is a design and craft team based in Cornwall, specialising in the production of bespoke wood and ceramic lighting. Continuing to channel the influence of the surrounding Cornish landscape in their work, they are excited to announce the launch of their latest lighting collection, Sandscape.

"Sandscape focuses on the beauty of the coastline, and it's shaping by our waters. We have designed sculptural pieces that capture the movement of water through the tidal sands and the simple yet impossibly complex ripples that are created."

Their new collection combines technology, digital manufacture and handcraft to bring the beauty of landscapes into interiors. Pictured in Oak & Walnut, the flow of the ripples dance amongst the grain of the wood, different tones and finishes altering the refraction of the light. The lights embody the natural landscape in every sense - elegant, alluring and timeless.

Sandscape brings versatility to different spaces. Combinations of multiple sizes and finishes can be arranged and overlaid in various patterns to create endlessly unique Sandscape installation options, reflecting the adaptiveness of renewing nature of the coast.

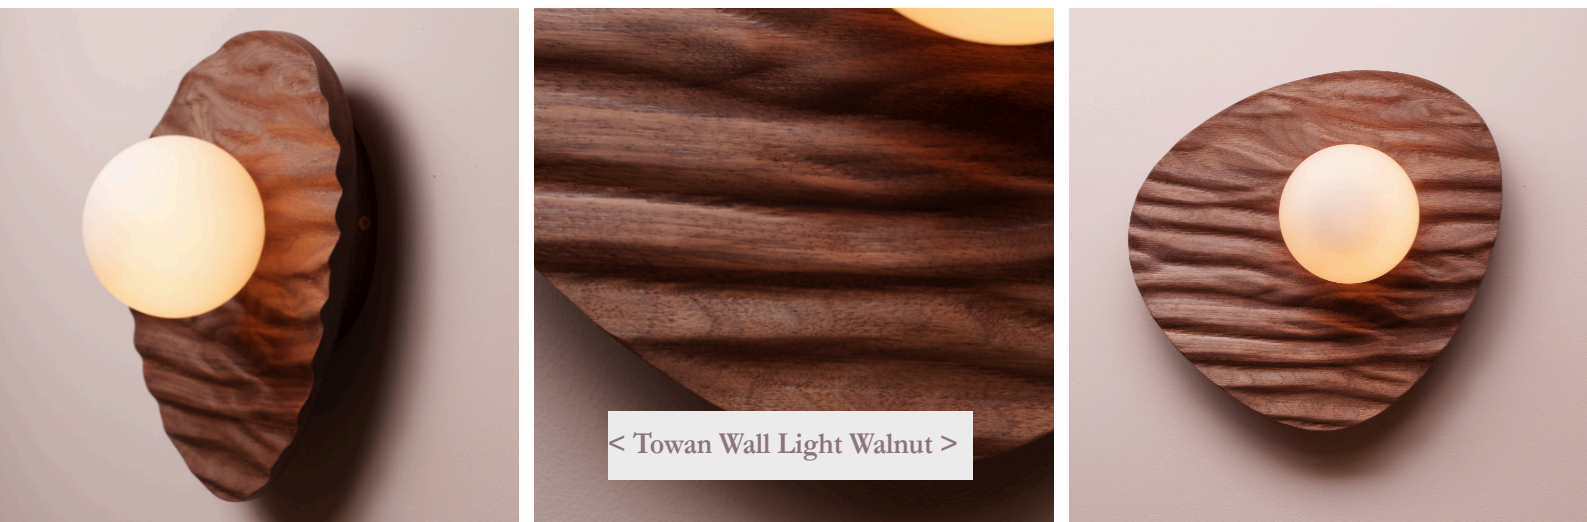

The collection will launch later this Summer, with the "Towan" wall light and "Porth" pendant pioneering the collection's release, and other wood pieces on their way. Studio Haran are also currently exploring the application of these patterns into ceramics, with more products to follow.

Starting From June 2025 the new lighting will be available to pre-order at www.studioharan.co.uk

To celebrate this milestone Studio Haran will be taking the new collection to exhibit at Clerkenwell Design Week in London from 20th - 22nd May. You will be to find them in the Light exhibition, at stand L31.
