

Nota: Pattio's collection of light side tables

Size, versatility, creation without limits, wherever and whenever it may be: it is with this concept Jorge Herrrea, in collaboration with Pattio, has created Nota. A programme of lightweight side tables with a light aesthetic that offer a support to turn any area into a casual place for work, impromptu meetings or relaxation. With a wide variety of finishes to choose from, Nota customises environments with a friendly, warm image.

With a fixed, easy-to-assembly structure or a height-adjustable structure achieved through an easy-screw mechanism, the Nota table can be used by all types of people of different heights, in a seated position, anywhere in the office or contract area.

Pattio has as many as four types of Nota tables; fixed or height-adjustable, both with a round or rectangular top with rounded corners. As for the finishes of the tops and the structures, you can choose up to 13 colour varieties.

The exchange of idea represented better than ever is a piece that moves, that changes. Nota was conceived inspired by simplicity and functionality to bring together around it different creative outlooks eager to share and co-create.
