

Bow chair: Pattio's bet on soft seating

Softness, ergonomics and an excellent combination of floor supports; three factors undergirding the strength and design of Bow Chair, one of the Pattio brand's first ventures into the soft seating genre.

Bow Chair's DNA combines approaches that are both simple and original, novel, but without extravagance, which meet the large demand for collective and comfortable spaces in offices and contract spaces.

Pattio, alongside the Valencian studio Yonoh, has conceived a product that combines personality and detail. Impregnated with an aesthetic philosophy of geometric lines and organic dimensions, Bow Chair merges with a free style that conveys relaxation, serenity and seclusion, but also dynamism, motivation and attitude.

Fixed and mobile chairs, with wooden or metal legs or pyramidal bases, Bow Chair reflects the soul of the Pattio brand through its extensive range of colours. Each of its finishes breathes the air of southern Spain thanks to the efforts of a creative team that has put everything into conveying a breath of light and warmth.

Meeting rooms, receptions, restaurants, cafeterias, hotel rooms, lounge areas or offices, Bow Chair is characterised by its great ability to adapt to any environment or practical need.
