

Conceal blinds from view with ShadeBox®

yewdaleDefiant®
FABRIC AND BLIND SYSTEMS

Shadebox®

Our latest innovation has grabbed the attention of architects, especially those who specialise in creating minimalistic, modern interiors.

We know that some architects don't appreciate roller blinds, especially seeing the barrel when they're not in use. But on the other hand, they want to control the amount of light entering the room. We created the ShadeBox® as a solution to this dilemma.

The ShadeBox® is designed to hide roller blinds from view when they're not being used. If shading is no longer required, the blind will ascend into the ceiling and be completely concealed by the ShadeBox®.

Simple installation:

The recessed box system can be fitted within a false ceiling or installed during the construction of the ceiling in new buildings. A tradesperson can dryline or plaster right up to the ShadeBox® using the drylining section component to create a seamless finish that will not be noticeable.

Options:

Small or large box cover, plain or drylining section, false ceiling adaptor, available in any RAL colour.

Specification:

YewdaleDefiant® ShadeBox® as manufactured by Yewdale, +44 (0)1268 570900. White aluminium powder coated white box available up to 5m in length, 115mm x 115mm. Components

Visit our [showroom](#) to see how discreetly ShadeBox® hides blinds!

This product range comes with a full Lifetime Warranty as standard.
