

Pepper Sq. Launches Alluring New Lighting: The A-spire and Uva Pendant Lights at Clerkenwell Design Week

Pepper Sq. are launching a new lighting collection at this year's Clerkenwell Design Week (23-25 May) - **the Uva Spherical Pendant Lights** and the **A-spire Pendant Lights** .

These new lighting designs artfully juxtapose vintage, retro, and avant-garde elements, epitomizing the essence of Scandinavian design and work for both commercial and residential projects.

The new lamps are designed by Susanne Nielsen, Danish lighting designer and EBB & FLOW's founder, whose strong passion for interior design and deep appreciation for different cultures and their artistic traditions give her creations a distinctive touch. EBB & FLOW lighting celebrates true craftsmanship and the talents of artisan makers.

Retro and Forward Reaching Design - The A-spire Pendant Lamp

The **A-spire pendant lamp** design is a delicious cocktail of a fusion of vintage, 1970s retro and forward-reaching. A linear silhouette that puts brushed brass and glass together in a true expression of Scandinavian design, **A-spire** has the scope to embrace sleek with earthy and organic.

A simple design that looks equally at home in a private home or a smart hotel;

"I took inspiration for the shape of A-spire from a lamp that hung in my parents' bedroom in the 1970s, it had 3 metal tubes inside each other. The lamp is long gone, no photos exist, but for the ones in my head", says Susanne Nielsen, EBB & FLOW's founder & designer.

In a rare move away from mouth-blown glass, A-spire is constructed using brass and borosilicate glass to achieve the two completely straight glass tubes for the design. A precise and technically advanced type of glass produced in bold vintage opaline colours white and blue.

For a very different look that reveals more of the lamp's brushed brass details, A-spire is available in transparent golden smoke, smokey grey and clear glass with horizontal cut lines as well as cool sand-blasted shades olive and grey.

The lamp uses a built-in LED light source, designed to direct light both downward and sideways. Complete joie de vivre - A-spire expresses a positive and joyful outlook on life.

A Cluster of Light and Elegance - The Uva Glass Pendant Lamp.

The new **Uva pendant light** design is inspired by the shape of a grape, the Italian word for the colourful fruit. A circular pendant that can be styled as singles, in rows, or clusters, much like a grape. Inspired by a product of nature, it is like bringing an illusion of nature into your home.

The pared-down simple brass ball and the glass and crystal balls revealed the look of a perfume bottle in a range of translucent colours and cuts. **Uva pendant lamp** is available in two sizes and a wide range of colours.

The **Uva pendant lamp** takes you through a European journey of craftsmanship. It is built of high-quality materials, produced in different parts of Europe. Mouth-blown glass and crystal, polished brass in gold or silver, and hand-cut crystal.

Pepper Sq. looks forward to unveiling the new collection from Danish lighting maker EBB & FLOW. Expect an eclectic mix of lighting, where dazzling design meets flawless functionality.

Thomas Kronevald, EBB & FLOW CEO said: *'We are excited to be partnering up with Pepper Sq. for this year's Clerkenwell Design Week. It gives us a great platform to launch our new pendants, Uva and A-spire in the UK, and to meet with both new and existing clients.'*

Each piece is a testament to the Pepper Sq. aim to present exceptional quality European designed furniture and lighting. The curated selection of lighting featured embody elegance, style and a touch of whimsical - all crafted by skilful artisans who blend creative ingenuity with masterful technique.

Pepper Sq.'s CEO, Oxana Yanushkovskaya, *"We're thrilled to be partnering with EBB & FLOW at this year's Clerkenwell Design Week. At Pepper Sq., we understand perfect lighting can instantly transform a room and set the mood. This new collection of pendant lamps reflects our dedication to bringing our customers extraordinary designs and matchless craftsmanship from all over Europe. We can't wait for aficionados to discover the dazzling difference our lighting can make in space!"*
