*London, UK – February 7, 2024*

Moventi, a pioneering designer and manufacturer of workplace furniture, is proud to announce the launch of its new C2 Configurator. This innovative tool offers a seamless and intuitive platform for designing custom office zoning, storage, and space dividing solutions.

The C2 Configurator, accessible through Moventi's website, provides users with a dynamic interface to explore and customize comprehensive options.

“At Moventi, we believe that every workplace deserves furniture as unique as the people who inhabit it,” says Kelvin Nunn, Chief Design Officer at Moventi. “With the C2 Configurator, we’re putting the power of customization directly into the hands of our customers, empowering them to create one-of-a-kind pieces that truly reflect their individual style and requirements, whilst making the specification process as easy as possible.”

Designed with user experience in mind, the C2 Configurator features intuitive controls and real-time rendering, enabling users to experiment with different layouts, finishes, and configurations with ease. Whether designing a collaborative open-plan office or a private executive suite, the configurator provides endless possibilities for customization, ensuring that every space is tailored to requirements.

"We are thrilled to introduce the C2 Configurator as the latest addition to our portfolio of innovative workplace solutions," said Kelvin. "Our goal with the it was to make the customization process as seamless and enjoyable as possible. We wanted to remove the barriers that often stand between customers and specifying these space dividing units, and I'm proud to say that the C2 Configurator accomplishes that goal."

The launch of the C2 Configurator reaffirms Moventi's commitment to innovation and excellence in workplace design. As businesses continue to adapt to evolving work environments and changing needs, Moventi remains a rising star in the industry.

### About Moventi:

Moventi's product design strategy sits at the core of our product collection. Driven by the demands of the ever-evolving workplace, we believe product design requires a holistic approach. We challenge each development project from many different angles to ensure we bring you designs that are aesthetically and operationally delightful.

We make it our duty to remain close to the emerging trends of working environments and the activities that are carried out within them. This means we can design, develop, and deliver products that are exceptional in both form and function, giving you the edge in the market.

We continually invest in new innovations and products based on a thorough understanding of how the modern working environment advances. As a certified Climate Positive business, we have gone beyond carbon neutral status to offset at least 110% of our impact. We achieved this by working closely with environmental professionals, who helped us calculate and erase at least 110% of our operational emissions through VCS verified nature-based solutions. This journey includes contributing to projects around the globe that are dedicated to avoiding carbon emissions and preserving natural habitats.

At Moventi we love what we do. We love creating delightful experiences for our customers, we love designing and manufacturing great products and perhaps more than anything we love having fun while we do it. We are a team of happy, friendly, excitable and, possibly, slightly random individuals on a simple mission to make buying furniture as easy and enjoyable as possible for our customers.
