

FOR IMMEDIATE RELEASE

Grestec Unveils Modern Interpretation of Venetian Terrazzo Floors

22.02.2024

Grestec, a supplier specialising in premium floor and wall tiles, is delighted to announce the launch of the high-performance tile collection, Ocara, an authentic range that reimagines Venetian terrazzo. With its six neutral speckled colours, Ocara introduces a fresh interpretation of this timeless aesthetic.

The porcelain tiles are made with stone chips of various shapes and sizes embedded in the mixture, echoing the look of classic Venetian flooring. As a full-body tile, its colour and pattern run throughout the structure, providing assurance that even with the top layer removed, the tile's appearance will be unaffected.

In addition to its visual appeal, the Ocara collection boasts exceptional functionality and mechanical properties. Crafted to withstand high-traffic areas thanks to its waterproof and wear resistant properties, these tiles ensure long-lasting quality while maintaining style and performance. With three surface finishes available – Natural ≥ 36 PTV, Polished, and Hammered R11/B – the collection caters to the needs of various public and commercial spaces both internally and externally.

Whether adorning the floors of luxury hotels, bustling retail outlets, or dynamic office environments, Ocara invites individuals to immerse themselves in the seamless fusion of tradition and innovation in architectural design.

For more information about the Ocara collection and to explore the full collection, please visit www.grestec.co.uk.

About Grestec:

Grestec specialises in supplying premium floor and wall tiles to architects and designers across the UK, boasting an extensive selection of high-quality porcelain, ceramic, glass, and natural stone tiles that are suitable for commercial, retail, and residential projects.
