

## Classic style for contemporary projects: introducing Marmora by Casalgrande Padana

*Marmora is Casalgrande Padana's new tile collection inspired by the timeless beauty of marble that stands out for its stunning low-relief veining.*

Aesthetic research, technological innovation, and sophisticated processes have made it possible to replicate the low-relief veining created over the centuries in sedimentary rocks worldwide. **Marmora** is the perfect combination of design and technical features: beautiful streaks filled with light and harmonious colour contrasts give life to an ideal balance of patterns and structure, evoking the finest marble nature has to offer.

A journey through matter, where three-dimensional light and shadow effects are emphasised by the new **smooth** and **vein-touch** finishes. The former gives the surface a silky, sophisticated appearance, while the latter provides an antiqued, super realistic three-dimensional look, enhancing every detail.

The **Marmora** collection comes in six colours (Grigio Antico, Lunese, Morato, Nero Antico, Palombino and Pavonazzetto) in a 10x60 cm size with a 9 mm thickness and a vein-touch surface, as well as 60x120 cm, 60x60 cm and 30x60 cm sizes, also with a 9 mm thickness, and 120x120 cm and 60x120 cm sizes with a 6 mm thickness, available with honed, polished, smooth and vein-touch surfaces.

Irregular veining draws three-dimensional surfaces and sophisticated tactile effects to explore uncharted creative possibilities and create contemporary projects with a classic style.

The Marmora collection has all the charm of marble and the excellent technical features of porcelain stoneware, allowing it to maintain its beauty over time. It's perfect for the **floors** and **walls** of any building, whether new or restored. In addition, this collection is ideal for the contract furnishing, hotel, hospitality, and wellness sectors and even for yachts and luxury boats.

**Marmora** is flexible and versatile and can be used with matching or contrasting colours, even with other Casalgrande Padana collections, to create **tailor-made furnishings**.

Casalgrande Padana porcelain stoneware tiles are durable, non-absorbent, and fire-resistant and maintain their beauty over time. In addition, they have antibacterial and self-cleaning properties, thanks to the [Bios Ceramics](#) technology (available upon request). They also resist flexure, frost, and wear. These tiles are completely recyclable and are not affected by temperature fluctuations, whatever the latitude. They feature great mechanical strength and do not warp or age.

**Casalgrande Padana** has always been environmentally conscious and committed to reducing its footprint. That's why it uses the best technologies, commits to a circular economy, and implements certified product, process, and environmental management policies.
