

Press Release

Strategic investment in pioneer for meeting room solution

BACHMANN expands strategic partnership with OCHNO

Stuttgart, 2024-01-25 – Investing in pioneering technology: With this strategic investment, BACHMANN Group, a leading player in the field of electrical engineering, is fortifying its commitment in OCHNO, specializing in direct current and audio-video technology. This consolidating BACHMANN's position as an innovator of classic and new workspaces.

OCHNO is a Swedish innovation company that specialize in simplifying and enhancing meetings by making them user-friendly, reliable, and efficient. Their solution facilitates seamless connections between various user devices and meeting room equipment through a single USB-C connection, particularly catering to the demands of hybrid meetings. Convincing for Bachmann GmbH, which intends to further expand its portfolio in the field of office solutions with strategic investments.

"We are excited to expand our proven partnership with OCHNO and see great potential in the collaboration. OCHNO's innovative solutions fit perfectly with our vision. This partnership will enable us to offer our customers even better products and services while further strengthening our position as an industry leader," says Peter Bachmann, CEO of the BACHMANN Group.

Olof Ermis, CEO and Founder at OCHNO AB, adds: "It is great, having BACHMANN Group as a partner. We see our collaboration as a perfect match. This will allow us to jointly innovate new products and digital services for the intelligent workplace.

BACHMANN Group's international presence will greatly contribute to a rapid growth for OCHNO."

Into the future as a service provider

With this investment, BACHMANN emphasises its commitment to promoting innovation and developing promising technologies. The acquired shares in OCHNO not only offer the electrical engineering company the opportunity to participate in the future successes of the start-up, but also enable close cooperation to jointly realise the full potential of the technologies.

The BACHMANN Group

BACHMANN, founded in 1947, is an owner-managed company with a global presence in the electrical engineering sector. Based in Stuttgart, the BACHMANN Group develops, produces and distributes innovative electrical components and systems such as intelligent power distribution units, desk connection panels and assemblies. In addition, BACHMANN provides intelligent solutions for the latest AV technologies and services.

Alongside the production expertise at our production and development centres in Germany, Romania and China, BACHMANN has a large number of international sales offices and partner companies and a partner network in 27 countries. With around 800 employees, the BACHMANN Group sets new benchmarks in specific customer benefits through function, design and innovation.

About OCHNO

Ochno AB is a Swedish innovation company that enables design solutions for tech problems in all type of meeting spaces. The fundamental idea is to gather everything you need to connect with each other, to one cable only. End of waiting time, cable clutter and frustration. One socket that provides power, video and communication to smart IoT-services. Just connect your USB-C cable into Ochno's smart socket and it will solve the rest paving the way for work, joy and success.
