

se:lab flip - a table with multiple possibilities

In a world where the working landscape is changing at an impressive pace, expectations are rising for flexible and versatile office furniture that is not only functional, but also aesthetic and of high quality. Modern offices are increasingly evolving into open, adaptable spaces, characterised by dynamic communication areas, diverse work zones and a wide range of spatial concepts. This evolution demands a new flexibility that promotes creative and productive dialogue in agile teams. Sedus has met this challenge with the se:lab product family, a versatile, individually configurable collection that adapts to changing needs, fostering inspiring work environments.

Sedus is consistently expanding its product range with the new se:lab flip table: "The dynamic change between seminars, meetings, workshops and teamwork in the same room calls for elegant, flexible furnishing solutions," says Ernst Holzapfel, Head of Marketing at Sedus Stoll AG. "se:lab flip tables can be folded and stacked with ease, creating more space in an instant. Their simple folding mechanism and safe handling ensure unrivalled flexibility and make every room adjustment a pleasure."

se:lab flip - networking made easy

Whether seminars, workshops, meetings or lectures: With the se:lab flip mobile stacking table, any application situation can be organised flexibly - and easily. Thanks to its castors, se:lab flip can be moved around the room effortlessly, and when it is not in use, all it takes are a few simple steps to fold up the table and stow it away to save space.

To fulfil the most diverse requirements in multifunctional rooms, se:lab flip has well thought-out details that make working easier. Sockets and wireless charging points can be integrated into the table top. This makes it easy to use electronic devices and at the same time ensures a tidy work surface. The tables can also be linked lengthways and end-to-end without tools and can therefore be fixed in a block position or row, for example.

With numerous table top sizes and shapes as well as other customisation options, se:lab flip can also be adapted to the surroundings, making it a valued addition to any environment.
