

sixteen3 Ltd Launches Eden: Soft Furnishing Planters Blending Biophilia with Upholstered Geometry

sixteen3 Ltd is pleased to announce the launch of its Eden range of planters. Designed as soft furnishing planters, Eden reimagines the integration of plants into interior spaces by blending biophilia with interior decor.

The Eden range offers a diverse selection of planter options, each designed to seamlessly complement interior decor alongside soft seating, cushions, and curtains. Available in four distinct shapes—round, square, D-shape, and quarter—and two heights—735mm and 1035mm—the Eden planters provide endless possibilities for configurations. Whether used as standalone pieces, grouped together, or integrated within a seating layout, the varying shapes and heights allow for dynamic arrangements that cater to various aesthetic preferences and spatial requirements.

At the core of Eden's design is its soft upholstered body, available in thousands of fabric options, which adds a touch of softness to interiors while maintaining a contemporary design. The upholstered design of Eden offers a unique advantage to interior designers by allowing simultaneous selection with other soft furnishings. This integrated approach streamlines the design process, enabling designers to create cohesive and harmonious interiors effortlessly. Additionally, Eden's customizable fabric options provide a broad palette of finishes and styles to seamlessly integrate with other design scheme elements. The sleek metal trim along the top, available in 24 standard colours, further complements any design scheme.

sixteen3 introduces Eden in response to the growing trend of incorporating plants into interior spaces. These planters are tailored to soften interiors and seamlessly incorporate planting, making them ideal for adding a natural touch to any setting. By accommodating both real and preserved or artificial plants, Eden promotes the benefits of biophilia, such as improved well-being, reduced stress, enhanced creativity, and increased productivity.

With an enticing blend of form, function, customisation and biophilic design, Eden is poised to redefine interior planting. Providing a soft and inviting platform for plants, Eden not only enhances interiors but also fosters a deeper connection with nature in modern spaces.

The Eden range will be available from launch on May 21st 2024. For more information about Eden and to explore the full range of sixteen3's furniture solutions, please visit www.sixteen.co.uk/products/eden.

About sixteen3:

Based in the North of the UK, sixteen3 is an independent furniture designer and manufacturer with a passion for sustainability and longevity. We take pride in our commitment to quality craftsmanship and eco-friendly practices, striving to make a positive impact by offering furniture solutions that are not only stylish and functional but also environmentally responsible.
