Teknion is pleased to introduce the newest workplace solutions addition to its diverse portfolio, Cosi Laptop Table. Combining Teknion's 30 years of experience in ergonomic innovation with Pearson Lloyd's visionary approach to design, Cosi emerges as a testament to the power of collaboration. Highly customizable and intuitive, the worksurface combines practicality and elegance to enhance any office environment. The Cosi Laptop Table boasts a comprehensive feature set to enhance productivity and comfort in any work environment. The worksurface adjusts to provide angled positions that support intensive tasks or visibility during video calls. A cleverly incorporated front lip secures the laptop while an integrated device stand allows users to keep their mobile device handy.

"As the corporate world continues to become more digital and employees spend extended periods of time hunched over their computers, workplace solutions that alleviate resulting negative health effects are crucial," says Hamid Zebarjad

Director, Design Engineering at Teknion. "Embodying Teknion's focus on empowering customers through design, the highly-customizable Cosi Laptop Table supports employees' posture and wellbeing while allowing them to dedicate their focus to the task at hand."

"We designed Cosi to be your agile office companion," says Luke Pearson, Co-Founder and Director of Pearson Lloyd. "What is a relatively simple piece of furniture has been thoroughly and thoughtfully designed. With discrete sliding levers and a rear phone bar for device accessibility and charging, Cosi exemplifies responsive, functional design. Its flat-pack shipping method significantly reduces carbon emissions, making Cosi a responsible choice for modern, flexible workspaces."

Crafted with versatility in mind, Cosi is remarkably lightweight and effortlessly portable. Intuitive and easy to adjust, Cosi places height and tilt controls directly under the worksurface. The base moves easily into the user's desired position while maintaining clearance around chair bases and feet, encouraging free movement and supporting users' various sitting postures. Available at an accessible price point, Cosi Laptop Table is built to support the modern employee, their posture, and work, regardless of their environment.
