APRIL 25, 2024

Teknion Corporation, a global leader in workplace furnishings and architectural solutions, proudly announces a significant milestone in its ongoing sustainability journey. The company has received approval for its "Near-Term Science Based Targets" from the renowned Science Based Targets Initiative (SBTi), marking a pivotal moment in Teknion's commitment to environmental stewardship. Making furniture holds significant implications for both people and the planet. Over the years, Teknion has diligently strived to minimize its environmental footprint and mitigate any adverse effects that the products may have.

"We are thrilled to announce the approval of our Near-Term Science Based Targets by the Science Based Targets Initiative," said David Feldberg, President of Teknion Corporation. "This milestone is a testament to the dedication and hard work of our team, and it reaffirms Teknion's commitment to environmental leadership. Achieving this recognition is a significant step forward in our ongoing sustainability journey."

Through ongoing efforts to reduce and reverse negative impacts, Teknion remains committed to sustainability. SBTi has played a pivotal role in guiding the company on this journey, allowing it to maintain momentum towards a more environmentally conscious future. This achievement underscores Teknion's enduring commitment to sustainability, a journey they have steadfastly pursued for years.

The Science Based Targets Initiative is a collaboration between CDP, the United Nations Global Compact, the World Resources Institute (WRI), and the World Wide Fund for Nature (WWF), which provides companies with a clearly defined pathway to align their emissions reduction targets with the latest climate science. By setting science-based targets, companies like Teknion demonstrate their commitment to limiting global warming and driving sustainable business practices.

As Teknion continues its sustainability journey, the company remains committed to transparency, collaboration, and continuous improvement. By setting and achieving Science Based Targets, Teknion aims to inspire its peers and stakeholders to join in the collective effort toward a more sustainable future.
