

## **PRESS RELEASE: Moventi Partners with Bristol-Based Revive Innovations to Create Unique, Sustainable Furniture**

Bristol, UK – 11th February 2025

Moventi, a leading innovator in furniture design, is proud to announce an exciting new collaboration with Revive Innovations, a Bristol-based company dedicated to transforming discarded CDs into stunning, sustainable materials.

Together, the two companies have launched a collection of unique, eco-friendly furniture pieces, including coffee tables, shelves, and more, designed to push the boundaries of sustainable design.

At the heart of this collaboration is Revive Innovations' groundbreaking terrazzo-style material, created from 100% recycled CDs. By melting down unwanted CDs without any additional ingredients, Revive Innovations has pioneered a repairable and fully recyclable composite material that not only prevents waste from reaching landfills but also showcases the beauty of circular design.

Moventi's expertise in furniture craftsmanship perfectly complements this sustainable material. One of the highlights of this partnership is the combination

of Moventi's Xavi coffee table base with Revive Innovations' terrazzo-style CD tops, creating a striking yet environmentally responsible piece of furniture.

These pieces represent a fusion of modern aesthetics, functionality, and sustainability, proving that recycled materials can be just as durable, stylish, and high-quality as virgin materials.

This partnership aligns with both companies' missions to reduce waste and challenge traditional perceptions of sustainable design. As CDs become obsolete, an estimated 1 million years' worth of plastic waste is accumulating in landfills.

Through innovative processing, Revive Innovations not only repurposes these materials but also actively works to improve local CD recycling infrastructure, ensuring a more sustainable future.

“At Moventi, we are always looking for new ways to integrate sustainability into our designs,” said Kelvin Nunn, Creative Lead at Moventi. “By partnering with Revive Innovations, we’re not just creating furniture - we’re contributing to a circular economy and proving that sustainable products can be both beautiful and functional.”

Revive Innovations, founded by Kieran Devlin, has been at the forefront of sustainable material innovation. Devlin’s journey began during his final year at university, where he recognised the growing issue of CD waste and developed a unique method to turn

discarded discs into valuable, long-lasting materials.

In addition to being made from 100% recycled content, the RE-CD material is repairable and fully recyclable, meaning they can be transformed and reused indefinitely; further reducing environmental impact.

Moventi and Revive Innovations’ collaboration is a testament to the power of sustainable innovation and a call to rethink how materials are used in design. By turning waste into beauty, they are setting a new standard for eco-conscious furniture.

At Moventi we love what we do. Driven by the demands of the ever-evolving workplace, we believe product design requires a holistic approach. We challenge each development project from many different angles to ensure we bring you designs that are aesthetically and operationally delightful. We make it our duty to remain close to the emerging trends of working environments

and the activities that are carried out within them. We continually invest in new innovations and products based on a thorough understanding of how the modern working environment advances. We love creating delightful experiences for our customers, we love designing and manufacturing great products and perhaps more than anything we love having fun while we do it.
