

# Teknion Introduces the Studio TK Jotta Chair

Now available in the UK through [Teknion](#), [Jotta](#) is a refined office chair that reflects the shifting needs of modern work environments. Designed by Estudi Manel Molina—renowned for its thoughtful, human-centred approach—Jotta strikes a harmonious balance between elegance and functionality.

Developed for Studio TK (a member of the Teknion family of brands), Jotta was created in response to the growing demand for adaptable work settings. It supports

a variety of postures and activities throughout the day—whether for focused work, informal collaboration, or casual conversation.

With a gently sculpted form inspired by the quiet, natural lines of woodland landscapes, Jotta brings an approachable and familiar presence to the workspace. Jotta aligns seamlessly with the UK's growing demand for versatile workplace solutions.

*"We recognise that today's workforce doesn't want to be tied to a single space for an entire workday," states Koorosh Sharghi, President at Studio TK. "In fact, furniture should be freeing. As people continue to incorporate laid-back work settings into professional landscapes, it's important to offer transitional, multi-use furnishings that work with, and not against them."*

*"The graceful arch of the cantilever arm reminds me of pine boughs," reminisces Manel Molina, Founder of Estudi Manel Molina. "These natural elements are not only inspirational but also a logical part of the design process. Nature's recognisable characteristics provide functional forms and inspire beauty, connecting us to the natural world."*

The chair's familiar shape embodies both beauty and functionality. Jotta is available in a cantilevered or looped aluminium arm with a fully upholstered seat. Paired with a four-star swivel base on glides or adjustable five-star task base on casters, Jotta may be finished in any of Studio TK's Fundamental or Fashion metal finishes, and an expansive choice of textiles and leathers.
