## Caffia at Clerkenwell Design Week: Design-Led Coffee for Modern Work-spaces

Caffia, the UK-based coffee and equipment specialist, is proud to take part in Clerkenwell Design Week, showcasing how exceptional coffee solutions can be seamlessly integrated into beautifully designed work-spaces.

With over 30 years of industry expertise, Caffia works closely with office fit-out companies, designers, architects, and facilities teams to support office refurbishments and new workplace projects. From early design stages through to installation and ongoing support, Caffia helps ensure coffee machines are carefully selected and thoughtfully positioned to complement both the aesthetics and functionality of modern offices and shared spaces.

Alongside design-led equipment solutions, Caffia sources high-quality coffee from renowned farms around the world, roasting every batch in its super-modern UK facility with rigorous quality control. The result is a coffee experience that not only looks right within a space but performs reliably and consistently for everyday use.

At Clerkenwell Design Week, Caffia is championing the idea that great workplace design should extend to every touchpoint—including coffee—supporting designers and fit-out partners in creating environments where people genuinely enjoy spending time.
