MILLIKEN PRESENTS THE SISAL EDIT FLOOR TILE COLLECTION: NATURAL AESTHETICS, NEUTRAL COLOURS AND BIOPHILIC DESIGN, CREATED FOR PRACTICAL USE IN HIGH-TRAFFIC SPACES

Milliken's brand new capsule floor tile collection 'The Sisal Edit' draws its inspiration from the tactility and textures of plant fibres, in particular: sisal, seagrass, and jute. The collection is led by a natural aesthetic, neutral colours and biophilic design, but interpreted for more practical use in heavy wear environments such as the workplace or hospitality interiors.

The Sisal Edit has been created by the Milliken in-house design team and made from the company's manufacturing plant in Wigan, UK. It celebrates the trend for natural fibres and softer colours (sun-washed and neutral, with chalky whites, warm oat, soft taupe and pale clay) in interior design. And reflects a shift toward a natural and tonal softness. This trend aligns perfectly with Sisal Edit's muted and earthy colourways, offering designers a way to create calm, grounded spaces that feel special and comfortable.

The Sisal Edit, designs: Looma, Zagora, Meela

The Sisal Edit has three designs: Looma, Zagora and Meela. In each a variety of weaves are used to create different textures, patterns and levels of durability. They all reinterpret organic textures for today's work, public and living spaces. They offer both elegance and sophistication, paired with a refined tactile and textural appeal, resulting in a premium appearance while maintaining the highest standards of performance and sustainability.

A collection crafted for interiors that demand versatility and style while being heavily used, such as hospitality environments and build-to-rent apartments. The Sisal Edit delivers a high-end look and feel with the durability high-traffic spaces require. WellBAC® Comfort Plus cushion backing significantly improves underfoot comfort and acoustics. It helps to create a quieter, more comfortable experience thanks to superior sound absorption and cushioned backing. By mitigating wear and tear, WellBAC® extends the lifespan of Milliken flooring, reducing its life cycle impact and makes re-use easier.

The optional addition of Milliken's TractionBack® friction coating to the cushion backing enables glue free installation. Minimising waste and potentially harmful VOC's. Glue free installation also facilitates re-use of the carpet tiles.

A companion collection is also available, where budget is paramount, a value engineered interpretation: The Sisal Edit Retold - a lighter weight construction using Milliken's WELLBAC® Comfort backing. Although less highly textured than The Sisal Edit a sense of depth and weight is created using Milliken's patented Millitron® printing technology.

As with all Milliken flooring collections, sustainability is at its core - responsibly designed to meet today's environmental standards, supporting green building schemes without compromising on design. The Sisal Edit is part of Milliken's M/PACT™ programme which off-sets the full cradle-to-gate carbon footprint and is manufactured in Milliken's UK manufacturing base certified to: ISO9001:2015 / ISO14001 / ISO45001 / ISO50001 using renewable electricity.

The recycled content of the Sisal Edit collection is 59% by total weight, and of the face fibre 100% Nylon including 40% ECONYL® recycled fibre. The backing has 95% recycled open cell polyurethane cushion backing. Sisal is certified Cradle to Cradle Silver, Declare Red List free, Indoor Air Quality – Certified for IAQ: CRI Green Label Plus and GUT.

Milliken & Company has been recognised with a 2025 EcoVadis Gold rating, placing the company among the top 5% of more than 150,000 organisations evaluated globally. This achievement reflects the company's strong performance in labour and human rights, environment, procurement practices, and ethics.

ABOUT MILLIKEN

Milliken is a leading supplier of floor coverings, with a rich history of delivering dynamic carpet and luxury vinyl tile collections from its award-winning design studios and manufacturing facilities in Wigan, UK. Combining global insight with national expertise and proprietary technologies, Milliken is at the forefront of innovation and design, offering high-performance, expertly-engineered products. Founded in 1865 Milliken has achieved an amazing 160 years in the textiles business and is now one of the largest privately owned companies in the world, providing expert solutions across

a range of disciplines, including specialty chemicals, floor coverings, and performance materials. With over 100 years of environmental stewardship, the Milliken family of companies is one of the world's most responsible manufacturers.

Designing innovative products and solutions for our customers is of the utmost importance. Through meaningful design, deep science, and unique insights, we advance product development to the next level, while supporting Milliken's efforts to increase sustainable results and minimise environmental impact of all products. Milliken's holistic approach to innovation encompasses all stages of the life cycle - from material sourcing and manufacturing practices to end-of-life management. Our commitment to transparency, health, safety, quality, and sustainability allows us to put our customers, associates, and communities first. In 2025, Milliken was named one of the World's Most Ethical Companies by the Ethisphere Institute for the nineteenth year running.
