

DI CANAPA

February 2026

Live Beautifully. Live Honestly.

Introducing Di Canapa by Studio Onesta:
A high-performance interior wall solution born from pure natural materials. By fusing industrial hemp, upcycled coffee, natural cork, and a 100% bio-resin, we have created a surface that doesn't just have an aesthetic function—it creates an earthly experience space using all 5 senses.

The result is a fire-resistant, food-safe, lightweight, waterproof panel with excellent acoustic properties. It exudes a natural smell and creates a tactile and stunning surface for any interior.

Intricate geometric patterns, 3D textures, or bespoke logos can be embossed directly into the surface.

Why Di Canapa?

We believe in a "zero compromise" material palette. Every panel is carbon negative, 100% bio-based, formaldehyde free, transforming carbon-capturing plants into structural and acoustic masterpieces.

Di Canapa provides a truly sustainable choice for those who care for design and the planet.
