

# Cambrian

Civil Engineering

## Introduction

With over 30 years of experience in the Construction Industry the team at Cambrian Civil Engineering are fully experienced and capable of delivering projects from a value of £5,000 to £25,000,000.

Running our own Plant and Equipment with directly employed teams of operatives gives on commercial edge and the flexibility to deliver on the ground without the risks of protracted supply chains.

We have the capability to undertake simple or complex designs with our design house partners and can therefore offer the complete package.

Principally working as a principal contractor, we are also capable of undertaking the subcontractor role.

We continue to serve both the local south Wales/South west regions and those further afield.
