Civil Engineering

WWW.CAMBRIAN-CIVILENGINEERING.COM

Over 30 years' experience of civil engineering & construction projects ensures that buildability is always considered in the design process.

Design

We have the capability to undertake simple to complex design with our technical partners. Early contractor involvement capability. Allowing us to get involved with designers at an early stage ensures the client receives the best value.

Cradle to Grave – Ability to design in lifecycle maintenance and ensure true lifetime costs can be assessed.

Construction

Over 30 years of experience in civil engineering schemes ranging from £5,000 to in excess of £100,000,000.

Currently working towards ISO 9001, 14001 & 45001 with BSI.

From Heathrow Terminal 5 & Channel Tunnel Rail link to minor civil Schemes within live electrical substations.

The ability to undertake civil engineering work in high-risk environments such as Airports, Highways, Rail & Live electrical substations.

Street works and CSCS qualified directly employed staff and operatives. All our team are fully qualified and undertake regular training to ensure they are up to date with all Health & Safety requirements.

Having our own plant hire business ensures all our equipment is fully compliant with legislation and we are not reliant on the supply chain for maintenance or supply.

Street works noticing & Traffic Management arrangements.

Deep excavations, Directional drilling and other no dig techniques.

Foundation and bunded structure construction, fencing (security inc. Substations), flood prevention & general Civils. Building modifications including refurbishment.

Structural works including Battery storage frames and supporting structures. Drainage, duct and cable installation.
