

MOBILE APPLICATION VPGo

Visual Planning's mobile application VPGo provides its users portable on the Go Scheduling.

- Use Visual Planning to access schedules from all smartphones and tablets
- Responsive Web Design
- Fully configurable, VPGo adapts to all your mobility needs.
- In addition to an existing Visual Planning configuration, VPGo will be your ally wherever you are

Personalize your platform :

- **Agendas** : Organize individuals, teams, customers, etc. in your personalized database
- **Lists** : Create inventories, resources, events, etc.
- **Customize displays, icons, colors, filters, etc.**

Benefits from Offline Mode :

- Operate VPGO without network connection
- Access and modify your data at any time, even without a network
- Re-connect and automatically updated your data will be as soon as network connectivity is available

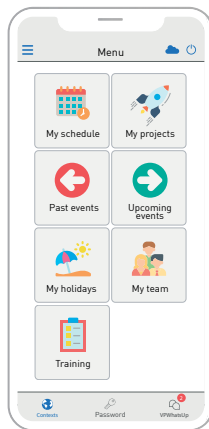

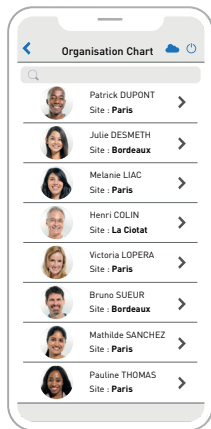

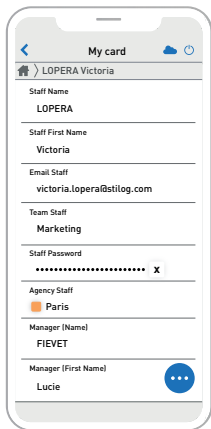

Integrated with mobile Features :

- Running with Android 5.0+ or iOS 8.0+
 - Push notifications
- Connects to your favorite apps for phone calls, email, and live navigation
 - Responsive Web Design

Integrated with Visual Plannig Client :

- View modifications in real-time
- No additional installation required
- Advanced user rights management features
- Includes access to **VPWhatsUP**, an instant messaging service to connect with team members

Among the possible applications:

- HR
- Time Tracking
- Field Service & Maintenance
- Customer Support
- Project Management
- Production Management
- Fleet Management
- CRM
- Etc.

Why VPGo?

- Check and update data in real-time: job progress, live reports, or inventory, etc.
- Have a customer or supervisor sign off a work order
- Add or access attachments: documents, photos, etc.
- Record working hours and requests for PTOs
- Track position routes and geolocate a client
- Report your working time and leave/absence requests
- Search for « resource » (material, stock, etc.) via QR code
